**Welcome to the brand-new TOP MIX 2026 catalog!**

This year, we approached our developments with a fresher, more energetic mindset to offer products that not only follow but also shape modern fishing trends.

Our experience on the water's edge, feedback from competitive anglers, and inspiration from our community all contributed to creating a bolder, more innovative collection for 2026. Our new groundbaits, pellets, and aromas work even more effectively across different water types and respond faster to the changing behavior of fish.

Keeping the needs of the younger generation in mind, we developed solutions that deliver maximum performance during fast, dynamic fishing sessions and competitive situations. We conducted all our tests under real conditions, so every product is backed by proven results.

Petrovics Richárd

**Our company founder, Papp József, is an individual and five-time team world champion, as well as a five-time Hungarian champion, pouring all his knowledge into our products.**

Of course, the company's competitive and test anglers also provide great assistance in this. Varga János is an individual method champion; Petrovics János, Petrovics Richárd, Papp Zoltán, Hoffmann Ferenc, Kerekes Ernő are team Hungarian champions; Csike István, who has won 2 national competitions in his own categories, and several others who are among the top 40 in the method fishing discipline.

The 2026 catalog offers a clear, easy-to-follow system: strong brand families, new flavors, fresh designs, and products that help you get even more out of every fishing trip. Whether your goal is a record catch, an action-packed method day, or simply an experience-filled weekend at the water's edge – we help ensure every cast presents an opportunity.

**Let's dive into the 2026 season together – with new energy, new ideas, and TOP MIX quality!**

Three-time League Champion,  
Top Mix SK MFT Team

# PRO SERIES

## CRUSHED Method Mix

### TM044 Green GLM Method mix

High-protein, coarser-grained method mix with green mussel extract and fishmeal. Its crunchy mussel shell pieces create strong visual and auditory effects underwater. Specifically for large carp, throughout the entire season.

### TM043 Carp Specimen Method mix

Specifically developed for large carp, a complex method mix. Characterized by high energy content, balanced grain size, and powerful attractant action. A confident choice for competitions and intensely fished waters.

### TM045 Krill Method Mix

Krill-based, high-protein method mix with excellent digestibility. Its crushed pellets encourage fast bites from peaceful fish without overfeeding them. A four-season, stable mix.

### TM049 Mosquito Larvae Method Mix

Finely ground method mix made with mosquito larvae extract. Dissolves quickly, triggering a fast response with its intense scent. Particularly effective for method feeder technique, but also works well in cage feeders, all year round.

### PRO SERIES - ICONIC PRODUCT RANGE

Product	Water Temperature	Target Fish	Technique
TM044 Green GLM	● All season	● Large carp	● Method
TM043 Carp Specimen	● Transitional/ ● Warm water	● Large carp	● Method, ● Competition
TM049 Mosquito Larvae	● All season	● Mixed	● Method, Feeder
TM045 Krill	● All season	● Carp	● Method
TM054 Hellfire	● Warm water	● Carp	● Method
TM051 Chocolate-Orange	● All season	● Carp, Crucian Carp	● Method

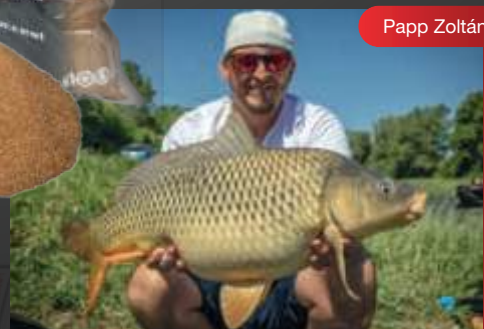

### TM054 Hellfire Method mix

Red-colored, highly spicy, fish-based method mix. Due to its fine grain size, it breaks down quickly with intense attractant action. Particularly effective in intensely fished waters.  
**Note: Strong material.**

### TM051 Chocolate-Orange

Premium quality mix made from crushed Coppens pellets with over 40% protein content. Intense chocolate-orange aroma, medium-fine grain size. Its fluorescent orange pellets further enhance the attractant effect. Usable all season.

# Method Mix

## TM183 AQUA MIX

The finely ground version of the popular Aqua grower pellets' ideal mix. We have created a blend that, based on our experience, works with even greater intensity on fish. Fish stocked from fish farms are familiar with these pellets, as more and more fish farms use them for feeding. Natural in character, therefore can be flavored as desired. Recommended for Carp, Crucian Carp, Bream, and Tench.

## TM041 Cold Water Method Mix

High-protein, evenly finely ground, black-colored, fishmeal-based method feeder bait prepared with red bilberry - coriander aroma. The black color is necessary due to the clear, transparent winter waters, independent of the bottom color. A late autumn, early spring water bait. Must be left to rest after mixing, then stirred again and can be pressed through a fine sieve if desired.

## TM039 Green Sweet Fish Meal

Special 50-50% blend of high-quality fish pellets and sweet biscuit meal. Thanks to its composition, it triggers a fast feeding response in fish and keeps them feeding for a long time. Usable regardless of season on intensively stocked lakes and natural waters where the target fish is primarily carp and crucian carp.

## TM170 PROTEIN SQUID Method Mix

High-protein pellet mix ground into a fine powder, resulting in a dark-colored bait containing squid meal. Made for the method feeder technique and primarily recommended for warmer waters.

Petrovics János

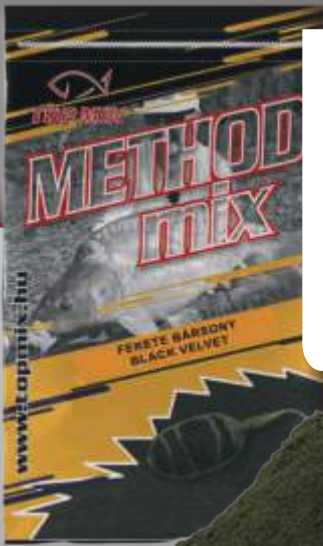

## TM172 Garlic Fried Liver Method Mix

Specifically for warm waters, with a very attractive aroma blend, high-protein bait made from several carp pellet grinds. Especially recommended for carp fishing.

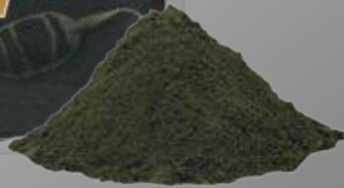

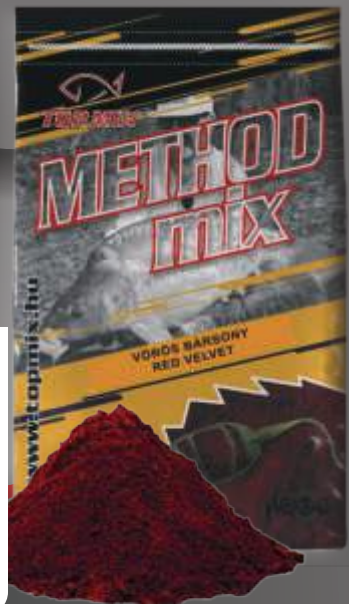

#### TM040 Black Velvet Method Mix

Evenly finely ground, black-colored, NON-fishmeal-based feeder bait prepared with a unique aroma blend. Also contains finely ground sweet fluorescent crumb, making it even more attractive. An all-season bait. Must be left to rest a bit after mixing, then stirred again and can be pressed through a fine sieve if desired.

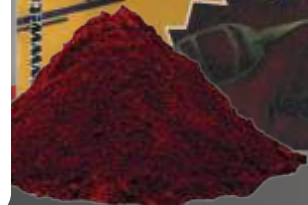

#### TM042 Mango

Bait made from ground carp pellet mix with natural mango aroma. The unusual pairing creates perfect harmony. An all-season bait. Suitable for cold late autumn or early spring waters, but can also be very effective in warm periods. Equally successful for carp and crucian carp fishing.

#### TM175 Red Velvet Method Mix

Evenly finely ground, red-colored, NON-fishmeal-based method feeder bait prepared with a unique strawberry-yogurt aroma blend. Also contains finely ground sweet fluorescent crumb, making it even more attractive. An all-season bait. Must be left to rest a bit after mixing, then stirred again and can be pressed through a fine sieve if desired.

#### TM173 Green Spicy Method Mix

All-season bait made from ground carp pellet mix with the addition of strawberry and fish aroma. Strawberry is perhaps one of the most attractive aromas in carp fishing. Its unique, incomparable spicy character magnetically draws fish to our hook even when they ignore other attractants.

#### TM166 Strawberry-Fish Method Mix

All-season bait made from ground carp pellet mix with the addition of strawberry and fish aroma. Strawberry is perhaps one of the most attractive aromas in carp fishing. The high-protein pellet grind extensively satisfies carp's energy needs. Suitable for cold late autumn or early spring waters, but also very effective in warm periods.

# SECTOR 1

Products in the Sector 1 bait family with red packaging do not contain fish-based ingredients. Guaranteed quality products made from carefully selected components. Can be used for any method, including method, long-legering, and cage feeder fishing.

### TM146 Sector1 Color Carp

Sweet-natured bait with partially roasted additives for carp and crucian carp fishing. The yellow particles are the Red Factor additive from the English company Haiths. Characteristically, the mixed bait nearly doubles in volume, its particles separate nicely, and after proper wetting, it does not require sieving.

### TM147 Sector1 Super Carp

Super bait for special situations! We devoted the most energy and fishing sessions to its creation. This high-carbohydrate, finely ground mix containing roasted and raw seeds contains no aroma, corn, or fish-based ingredients! Mixing one bag requires 2 dl of water. Could be a real favorite among method anglers too.

### TM148 Sector1 Maxxx Corn

Bait made from various corn derivatives, with natural corn scent, free of aromas and colorants. Its dissolution is extremely fast. Best results are achieved where fish are already full of many aromas and fishy baits. Can be used in warming spring waters and already warmed-up waters.

### TM149 Sector1 Dévér (Chub)

Brown-colored, finely ground competition bait made with used Oreo cookies, prepared with natural spices, sweet in nature. Absorbs little water. After proper mixing, we get a soft, crumbly, light mix. If necessary, use clay for weighting.

Products in the Sector 1 bait family with silver-gray packaging contain a high percentage of premium-quality, carefully selected pellet grinds and fishmeal. All four baits are finely ground and break down quickly.

### TM143 Sector1 F1 Carp

Light brown-colored, fine-grained sweet-fishy bait. Thanks to its special sweet aroma and components, it's a true four-season mix. Not only irresistible for carp, but larger bream and crucian carp also "jump" on it.

### TM144 Sector1 Super Green

Very high-protein, strongly fishy, green-colored bait. Extremely fine-grained and breaks down quickly. Thanks to its fast dissolution and "clouding" effect, it quickly draws fish around our feeder.

### TM142 Sector1 F1 Dark

Dark-colored, fine-grained sweet-fishy bait. Thanks to its specially sweet aroma and components, it's a true four-season mix. Thanks to the dark color, it can easily deceive more cautiously feeding fish. Not only irresistible for carp, but larger bream and crucian carp also "jump" on it.

### TM141 Sector1 Maxxx Fish

High fish oil content, strongly fishy, fine-grained bait spiced with a little special aroma. Our most fishy bait currently in production.

TM137 Sector1 Spray Mango  
 TM138 Sector1 Spray Sweet Pineapple  
 TM139 Sector1 Spray Squid  
 TM140 Sector1 Spray Butyric Acid

**Sector1 Spray**

Aroma sprays in the same flavors as the Sector1 Waffer range. The flavors judged by us as the most attractive and most proven have been bottled. These liquids contain extremely concentrated aroma concentrates that quickly draw fish near our hook. They also have coloring and clouding effects for an even more intense result!

Papp Zoltán és Papp József

**Sector 1 Waffers**

A winning waffer hookbait couldn't be missing from the Sector 1 product family. These were made using the currently best available base materials and aromas, with their buoyancy adjusted so that even the thinnest hair rig attached to a small hook keeps it down. Moderate dissolution makes this dumbbell-shaped bait even more irresistible. To be truly suitable for every situation, sizes 8 and 10 mm are included in one box.

TM131 Sector1 Waffers Mango  
 TM132 Sector1 Waffers Sweet Pineapple  
 TM133 Sector1 Waffers Squid  
 TM134 Sector1 Waffers Butyric Acid

**Sector1 Box**

Carefully selected special blend of fish pellets that hold their own even under competition conditions. We shaped the types so there is a suitable solution for any situation, be it winter or summer fishing, or specialized specimen hunting. The box contains 400g of pellet mix, a small tub of Sector1 Waffer hookbait, and the betaine-enriched liquid needed for mixing.

495 Sector1 Pellet Box, for Cold Water  
 496 Sector1 Pellet Box, Summer  
 497 Sector1 Pellet Box, Premium  
 498 Sector1 Pellet Box, BIG

### Retro Fishing Program:

OUR PRODUCTS' RETRO FLAVOR WORLD - A LOOK BACK AND TRIBUTE TO THE CLASSIC AROMAS OF THE PRE-2000 ERA.

#### Retro Fishing - Dynamic carp feeder pellets

A pellet family compiled based on years of experience for the method feeder technique, consisting of a complex mix of four types of AQUA and colored sweet pellets. Fishy, therefore high in protein, and attractively colored; thanks to its carbohydrate components, it triggers a fast feeding response in fish and keeps them feeding for a long time.

- TM298 Dynamic carp feeder pellet - Paprika Bread
- TM299 Dynamic carp feeder pellet - Garlic Langos
- TM298 Dynamic carp feeder pellet - Plum Pálinka

#### Retro Fishing - Economic Complete Mix

Our most popular bait family for many years. These baits don't even need wetting; they are packaged ready for fishing. Before starting to fish, we just need to open the bag, and the feeder can be filled! Its evenly dissolving ability can be further improved by sieving.

- TM062 Economic Complete Mix - Paprika Bread
- TM063 Economic Complete Mix - Garlic Langos
- TM076 Economic Complete Mix - Honeycomb Honey
- TM097 Economic Complete Mix - Plum Pálinka

#### Retro Wafers 8mm és 10mm

Members of the Top Mix Retro wafer product family are made for feeder anglers who like attractive dissolving hookbaits. Lightened pellets, but just enough so they can be used with fine hair rigs and #14 hooks even with the smallest, size 8. Dissolution ability is intense, "open bait," so its nutritional value also lures fish that wander by, alongside the aroma.

#### Retro - Aqua Nitro Boost Gel

Aroma gel developed for method feeder fishing, specifically for Aqua Garant pellets, but also effectively usable for fine tackle or ribbed cage feeder methods. The thick aroma gel spreads horizontally on the bottom, exerting its strong smoky effect on the bottom so the flowing water doesn't carry the fish away too far. Its intense aromas lure nearby fish to our feeder, thereby allowing us to tempt them to bite faster. PVA-friendly product!

- TM107 Aqua Nitro Boost Gel - Paprika Bread
- TM108 Aqua Nitro Boost Gel - Garlic Langos
- TM117 Aqua Nitro Boost Gel - Honeycomb Honey

- TM251 Retro Wafers 8mm - Paprika Bread
- TM252 Retro Wafers 8mm - Plum Pálinka
- TM253 Retro Wafers 8mm - Garlic Langos
- TM254 Retro Wafers 8mm - Honeycomb Honey
- TM255 Retro Wafers 8mm - Zizi
- TM256 Retro Wafers 8mm - Danube Gravel
- TM257 Retro Wafers 10mm - Paprika Bread
- TM258 Retro Wafers 10mm - Plum Pálinka
- TM259 Retro Wafers 10mm - Garlic Langos
- TM260 Retro Wafers 10mm - Honeycomb Honey
- TM261 Retro Wafers 10mm - Zizi
- TM262 Retro Wafers 10mm - Danube Gravel

# Method Carp

Kerekes Ernő

## METHOD CARP – FOR MODERN CARPING

The method technique is one of the most effective and visually spectacular fishing methods today. We specifically developed Method Carp baits for this purpose: they break down quickly, stick well in the feeder, and with their intense scent, they draw fish in moments.

The mixes contain carefully selected particles, carbohydrates, proteins, and additives, so they work stably all year round – be it natural water or stocked lake.

### TM125 Method Carp Strawberry Cream

Classic strawberry flavor boosted with sweet caramel – this makes it truly intense and attractive. Visible, conspicuous particle size, high carbohydrate and protein content. Deployable anywhere, in every season.

### TM126 Method Carp Chocolate-Orange

The pairing of sweet chocolate and fresh orange immediately grabs carp's attention. Acts fast, ideal if you want an action-packed session all season.

### TM127 Method Carp Honey-Tiger Nut

The softness of honey and the oily, natural aroma of tiger nuts make a true specimen combination. Tuned for large carp on both stocked lakes and natural waters.

### TM128 Method Carp Pineapple-Butyric Acid

Brutally attractive, sweet-sour mix. Raises fish interest from afar, particularly strong in warm summer water.

### TM130 Method Carp Sweet Corn

The eternal favorite – sweet corn – now tuned for method. Natural flavor, conspicuous yellow color, universal choice for the whole season.

### TM131 Method Carp Mango

The fresh, juicy mango's sweet-tropical aroma immediately grabs fish attention. Creates a strong scent cloud in the water that quickly draws carp and crucian carp to the feeder. Fast dissolution, vibrant color, intense flavor world – a true summer weapon for warm water.

### TM132 Method Carp Raffaello

Coconut-creamy sweetness with an almond tone. A unique, creamy scent world that fish find hard to resist. Balanced nutrient composition and strong aroma – when you want to win with unconventional flavors.

### TM133 Method Carp Dubai Chocolate

Creamy chocolate spiced with Eastern sweets. A special aroma that quickly arouses the interest of large carp. Ideal for overfished waters and competitions.

## WHAT'S IN THE BAG?

- FAST DISSOLUTION, SPECTACULAR BREAKDOWN
- INTENSE, CHARACTERFUL AROMAS
- BALANCED CONTENT
- PARTICLE SIZE OPTIMIZED FOR METHOD FEEDER
- WORKS ON LAKES AND NATURAL WATERS

2016 NEW PRODUCT

# FEEDER Pro

**TUNED FOR PROFESSIONALS**

**TM036 Feeder Pro Lake Balaton**

Mix optimized for natural waters, especially large expanses of lakes. Sticks well yet creates a strong fog upon breakdown, thus keeping the fish in the area longer. Reliable choice from spring to autumn.

**TM106 Feeder Pro Strawberry Cream**

Feeder bait made with intense, creamy strawberry aroma. Breaks down quickly, creates a spectacular scent and flavor cloud that immediately arouses carp interest. Excellent choice for both competitions and everyday fishing, in warm and transitional water temperatures.

**TM037 Feeder Pro Mango**

Vibrant orange-colored, intense mango-scented feeder bait. Breaks down quickly upon hitting the water, creating an attention-grabbing cloud. Its particle size is ideal for carp and crucian carp fishing, especially in warmer water.

Varga Róbert

**TM068 Feeder Pro Butyric Acid / N-Butyric**

Fish-free composition bait with natural butyric acid effect. Its white color provides strong fog formation upon breakdown, attracting fish from afar. Recommended for Grass Carp, Carp, and Crucian Carp, mainly in warm periods.

**TM070 Feeder Pro Carp-Crucian Carp**

Mix made with fruity, specimen aroma. Its oily seeds and varied particle size help keep fish feeding. Especially effective for carp and crucian carp in warm water.

Sárvári Lajos

**TM071 Feeder Pro Cold Water Carp-Crucian Carp**

Finer-grained, more restrained aroma bait for cold water conditions. Triggers a fast response even when fish feed cautiously. Ideal choice below 15°C water temperature.

**TM104 Feeder Pro Sweet Corn**

Coarser-grained, classic corn-based bait. Due to its high carbohydrate content, it specifically targets larger carp. Delivers best results in warm water.

**TM105 Feeder Pro Sweet Corn Black**

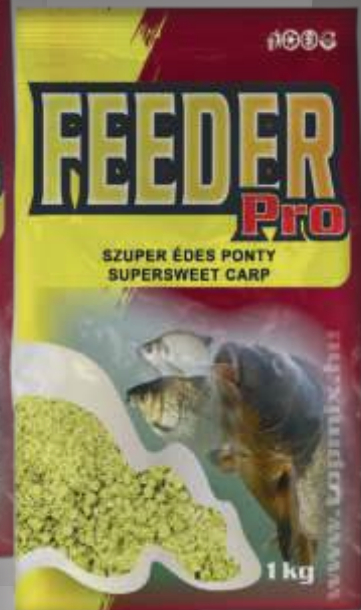

Black-colored, finer-grained corn mix. Recommended for colder water and cautious fish, when restrained appearance is an advantage.

**TM069 Feeder Pro Super Sweet Carp FINE**

Small-grained, extra sweet bait. Works quickly even in cold water and competition conditions, keeping fish in the area with its fine breakdown.

**TM072 Feeder Pro Super Sweet Carp**

Coarser-grained version for warmer waters. Characterized by fast breakdown, intense sweet flavor, and spectacular effect, particularly effective on active carp.

**TM073 Feeder Pro Spice Dévér (Chub)**

Spicy-natured feeder bait based on natural ingredients. Due to its fine grain and restrained color, even more cautious fish are not scared away. Developed for chub, but can be effective on mixed fish stocks all year.

**FEEDER Pro**

# FEEDER Pro

READY TO USE

Feeder Pro Ready baits serve fast, efficient, and convenient feeder fishing. These mixes come bagged ready to use, so no prior wetting or complicated preparation is needed. The carefully composed particle size and composition ensure fast breakdown and instant attractant action while keeping fish feeding.

Specifically developed for carp fishing, but also successfully applicable on mixed peaceful fish waters. Feeder Pro Ready family members are ideal for both method feeder and traditional cage feeder. Reliable operation, proper breakdown, and predictable results characterize them.

Feeder Pro Ready to Use – when you just need to fill, and the bites can come.

Ferenc Patrik, Slovak Method Feeder Champion

# CARP NUGGETS

Hoffmann Ferenc

## CARP NUGGETS

*Coarse particle size, strong attractant effect – specifically for carp fishing.*

Carp Nuggets mixes work with large particles, fishmeal pellet pieces, and intense aromas. They break down quickly, provide strong visual stimulus with fluorescent colors (red, orange, yellow), and effectively direct fish to the feed.

### IDEAL CHOICE FOR:

- Cage feeder and feeder fishing
- Base feeding and bait mixes
- Loaded into PVA mesh
- Making stick mixes

Made with black halibut pellet content and a marked carp flavor profile. Conspicuous even in murky water, fast-acting bait.

**Tuned for large carp. Fast reaction. Spectacular breakdown.**

- TM024 Carp Nuggets Pineapple
- TM025 Carp Nuggets Butyric Acid
- TM026 Carp Nuggets Spicy Liver
- TM048 Carp Nuggets Mango

### Feeder Pellets

These excellent quality pellets cannot be missing from the base feeding of carp anglers. With their fairly fast dissolution, they immediately grab the attention of fish staying near the feed. During dissolution, they create a long-lasting attractive flavor and scent cloud near the bottom and around it. Available in 6 mm size, 3 kg packaging. Can be used directly for feeding, for spodding pre-baiting, or even loaded into PVA mesh for direct spodding.

Total dissolution time: 30-60 minutes.

**PROVEN RECIPE, VERSATILE USE**

Carp Line baits are available in fruity, sweet, cheesy, and fishy flavors so there's a suitable choice for every water and fish species. Effective for carp, bream, and river fish – be it float, feeder, or classic baiting. Made from quality ingredients, they stick well, have medium dissolution, and work reliably in the water.

# CARP LINE

Simple choice. Sure catch.

Economical 2.5 kg packaging.

### ECONOMIC COMPLETE BAITS

The justifiably popular Economic bait family's further thought-out, further developed version. These baits don't even need wetting, as we've already done that! You just need to pour the opened bag's contents into the feeder or cage feeder and you can start fishing! Fast, clean, and effective. Perhaps these three words could characterize these baits made primarily for carp fishing.

- TM066 Economic Complete Grass Carp
- Garlic-Butyric Acid
- TM067 Economic Complete Black Halibut
- TM075 Economic Complete Strawberry-Raspberry
- TM076 Economic Complete Honeycomb Honey
- TM077 Economic Complete Vanilla
- TM078 Economic Complete Carp-Crucian Carp
- TM079 Economic Complete Winter Carp
- TM091 Economic Complete Mango
- TM092 Economic Complete Cheese
- TM093 Economic Complete Liver
- TM094 Economic Complete Pineapple
- TM095 Economic Complete Butyric Acid
- TM097 Economic Complete Plum Pálinka

### ECONOMIC + EXTRA PELLET BAITS

Favorably priced, pellet-enriched, mid-category, general-purpose bait family. Consists of nine types of bait, in 1 kg packaging, with quite special flavors, completely covering hobby anglers' needs from carp to bream, from float fishing to cage feeder fishing, and from still water to river. Nine types of bait, nine types of base feed, whose components are still TOP MIX's quality ingredients. They contain all elements that promote successful fish catching. They stick sufficiently, have medium dissolution time.

- TM179 Economic Winter Carp
- TM180 Economic Vanilla
- TM181 Economic Honey
- TM182 Economic Strawberry Raspberry
- TM160 Economic Cheesy
- TM162 Economic Dévér (Chub)
- TM163 Economic Carp-Crucian Carp F1
- TM164 Economic Carp-Crucian Carp F2
- TM165 Economic Sneck

# DYNAMIC CARP

## DYNAMIC CARP

A pellet family for the Method feeder technique, consisting of a complex mix of four types of AQUA and colored sweet pellets, compiled based on experience. Fishy, therefore protein-rich and attractively colored; thanks to their carbohydrate components, they trigger a fast feeding response in fish and keep them feeding for a long time.

DYNAMIC CARP pellet is an attractive and balanced carp food; the colored micro pellet in it enhances the mix's effect, so not only the flavor but also the visual appeal arouses fish curiosity. The pellet provides excellent and versatile use when soaked in water and pressed into a cage feeder, or loaded into an open-ended feeder. Usage suggestion: put the amount of pellet you intend to use into a bait bowl, pour enough water (and aroma) to cover it, let it soak for a minute, then pour off the water and mix a little. Then wait ten minutes, and the pellet will be perfect consistency for the cage feeder. Can be used well regardless of season on intensive lakes and natural character waters where the target fish is primarily carp and crucian carp.

- TM275 Dynamic Carp pellet Strawberry
- TM276 Dynamic Carp pellet Pineapple
- TM277 Dynamic Carp pellet Chocolate-Orange
- TM278 Dynamic Carp pellet Squid
- TM279 Dynamic Carp pellet Butyric Acid
- TM281 Dynamic Carp pellet Mango
- TM283 Dynamic Carp pellet Liver
- TM296 Dynamic Carp pellet Honey-Tiger Nut
- TM297 Dynamic Carp pellet Cold Water

## DYNAMIC PELLET BOX

The Dynamic Box contains a special mix of fishy, therefore protein-rich, and carbohydrate-rich pellets, with the 100ml aroma quantity needed for preparing the 400g pellet mix for fishing. By opening the aroma bag and pouring its contents onto the pellet, then shaking well and letting it rest for 10-15 minutes. The mix is then usable, can be loaded into the feeder.

# BUWA

## SILVER CARP

### BIGHEAD CARP (BUSA) – Targeted Power

Bighead carp fishing is becoming increasingly popular – not without reason. Huge-sized fish require special, targeted feeding. Since bighead carp's natural food is plankton, this was the primary consideration in bait development: to create a dense, active cloud that attracts and holds the fish.

For us, this wasn't a matter of compromise. We didn't copy, we learned: we visited China several times, the world's determining center for bighead carp fishing. We contacted local anglers and bait manufacturers and returned home with complete, percentage-based recipes.

The composition of BUSA baits there differs from domestic practices, but every ingredient is available in excellent quality in Hungary too. Based on this knowledge, the BUSA product family was born.

### BUSA Float Baits

Specifically developed for bighead carp, plankton-effect baits kneadable into feeders. Simple to use: just mix with water – even with milk – then fill the feeder.

- High nutritional value, dense consistency
- Creates intense, spectacular cloud in water
- Plankton-feeding fish filter feed through the cloud – the hook remains nearby

The 800 g packaging creates a fluorescent-colored cloud in water.

#### Recommended use:

- 2.5 kg packaging: for base feeding
- 800 g packaging: for loading into feeder

**TM167 Busa Float Fluo Raspberry 800g**

**TM168 Busa Float Fluo Plankton 800g**

**TM177 Busa Float Garlic 2500g**

**TM178 Busa Float Bird's Milk 2500g**

### BUSA Float Bait for Spod Rod

Original Chinese, plankton-imitating bait developed for bighead carp, kneadable onto the hook or into the small feeder above the hook. Just mix with water or even milk, press into feeder, and use. Creates a high-nutrition cloud in water, so plankton-feeding fish greedily filter the water near the ball, thus can be lured onto the hook too. Not much is needed per fishing session, hence 450g packaging.

**TM174 Original Chinese**

### BUSA Bottom Baits

Specifically tuned for bighead carp, plankton-imitating bottom baits for feeder fishing. Can be deployed mixed with water or milk, simple to use. Creates a strong cloud upon hitting the water, through which plankton-feeding fish filter the water – thus the bait is always where it needs to be.

What makes it truly special:

- Works upward as well when exiting the feeder,
- the kneaded ball remains intact,
- thereby ensuring suction of short hooklinks too.

#### Recommended use:

- 2.5 kg: for base feeding
- 800 g: for loading into feeder

**TM203 Busa Feeder Fluo Raspberry 800g**

**TM204 Busa Feeder Fluo Plankton 800g**

**TM206 Busa Feeder Garlic 2500g**

**TM207 Busa Feeder Bird's Milk 2500g**

### Plankton Tablet for Bighead Carp Rods and Rigs

The BUSA tablet is not a traditional pressed bait. Fine-grained, high-pressure pressed formula that slowly, continuously dissolves upon hitting the water while creating a constant plankton cloud.

#### Available flavors and effects:

- **TM158 Fluo Plankton** – vibrant yellow, fluorescent dissolution
- **TM157 Fluo Raspberry** – spectacular fluorescent red cloud
- **TM160 Bird's Milk** – proven, legendary BUSA attractant aroma
- **TM159 Garlic** – classic bighead favorite

Its dissolution provides cloud and thus continuous activity. After use, don't throw away – can be reused after slight drying.

# 大板大板 大板大板

### Bighead Floats

Floats made for feeder bighead carp fishing. The 50 and 60g floats are large enough to carry the ball kneaded into the bighead feeder.

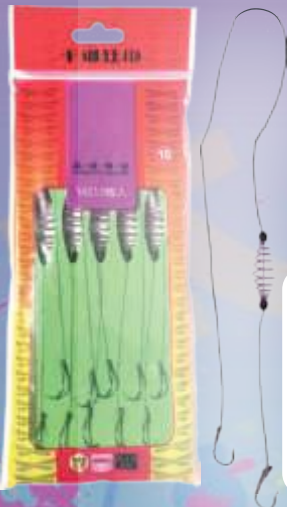

TM758 Bighead Float 50g  
TM759 Bighead Float 60g

The homeland of bighead carp is China. Numerous methods for catching them with hooks have developed in their home country. Some are incompatible with our fishing regulations, such as using more than two hooks, but there are also many that are legal and usable with good results here. This is interesting also because it's a very good sport fish; hooking and playing a larger specimen can be a real angling experience. And I haven't even mentioned that some specimens can reach 60+ kg. Their fishing is gaining more and more ground here too; quite a few methods work successfully. However, through proper contacts, we looked around in their homeland and brought back the knowledge and experience of local anglers. This way, you get access to the original equipment for the most popular method there, spod fishing: rods of appropriate strength, landing nets, baits made by us based on recipes of baits used there, special bighead hooks, floats.

### HANDING Bighead Hooks

Hooks specifically developed for bighead carp fishing are manufactured by HANDING company, which has great experience in bighead carp fishing. Thanks to their special material, they are stronger yet lighter than traditional hooks, so the bait moves lightly, floating in the water. Their design adapts to the characteristics of large fish, providing secure hook hold during playing. Precise manufacturing results in high load capacity and stable hold. Ideal choice for both suspended and bottom bighead rigs.

HD2084 Handing Silver Carp Hook #2  
HD2085 Handing Silver Carp Hook #3  
HD2086 Handing Silver Carp Hook #4

### HD2050 Bighead Rig with Feeder

Specifically developed for bighead carp fishing, pre-tied bighead hooks with small feeder. One rig has 2 hooks, which need to be looped into the swivel below the lead. One hook should be about 5 cm lower than the other. The bait goes into the small feeder above the upper hook. This way, with the falling particles, the bighead can suck in either the lower or upper hook. The distance between feeder and hook is adjustable.

### TM738 Bighead Rod for Float, Tablet Fishing

Made for float, tablet bighead fishing. Can be used with only bait pressed into the feeder, with bait and tablet, or even with two tablets if the feeder is removed from the stem. The "cross" is aluminum, while the stem and feeder are made of steel. Length: 20 cm

### TM739 Bighead Feeder

Simple, wallet-friendly solution made for float, tablet bighead fishing. Can be used with only bait pressed into the feeder and with tablet if the feeder is removed from the stem. The stem and feeder are made of steel. Length: 13 cm

# 大板大板

### HD2051 Suspended Bighead Feeder

Special bighead rig, equally suitable for bottom and float methods. The lead on the line allows adjustment of the feeder height and thus the hooks relative to the bottom. The lead also secures the rig. A feeder or float rig can be attached to the line end. The feeder opens for loading. Economical bait solution. The rig has two hooks, whose hooklink length is also adjustable.

### Shui Zhong Yan Floats

The "Underwater Eye" float is made for those who want to see every bite. Its design refined over hundreds of practical tests ensures quick setting and extremely sensitive indication.

Nano-technology PMI material and straight-axis internal mechanism provide more accurate feedback when it really counts. Its special reflective coating provides a clear picture in sunlight and highlights the bite in cloudy weather. The reinforced, flexible connection point and thickened tail guarantee long lifespan.

Ideal choice for both delicate fishing and decisive bites – not without reason recommended by experienced anglers too.

### HD2052 Handing Float Connector

Connector element made for Chinese bighead floats. Need to insert the float end into the silicone-rubber connector hole. This sufficiently secures the float. The line must be passed through the hole of the built-in wear-resistant (yellow) insert. This way the float slides easily on the line. One package contains 6 connector elements.

### HANDING Pre-tied Spod Rod Bighead Hooks

Specifically developed for bighead carp fishing, very special UV-glued, bandage-tied super strong and sharp bighead hooks. One rig has 2 hooks, which need to be looped into the swivel below the lead. One hook should be about 5 cm lower than the other. The bait goes onto the upper hook. This way, with the falling particles, the bighead can suck in either the lower or upper hook.

Code	Designation	Hook	Line
HD2068	Handing Bighead Rig	4	0,28mm
HD2069	Handing Bighead Rig	4	0,32mm
HD2070	Handing Bighead Rig	3	0,28mm
HD2071	Handing Bighead Rig	3	0,32mm

HD2073	Handing Bighead Rig	2	0,32mm
HD2074	Handing Bighead Rig	2	0,37mm
HD2075	Handing Bighead Rig	2	0,40mm

### Lead Tape

Special lead for float weighting. Flat lead wound on a central holed core. The lead needs to be threaded onto the line. For float weighting, cut off as much from the tape as needed for the float to sit well. One mark on the lead represents 0.1g.

- HD2083 Lead Tape 2g

### HANDING LWG RUBBERIZED SPECIMEN LANDING NET HEAD

Manufactured by HANDING company, top-quality, high-load-capacity, rubber-coated, deep, specimen-sized 50 x 60 cm landing net head. With this net head, even an 80 kg fish can be lifted.

### LWGCW03 HANDING TELESCOPIC SPECIMEN LANDING NET HANDLE

Manufactured by HANDING company, top-quality, multi-layer 40T carbon-made adjustable length landing net handle. Total length 4 m.

The Chinese rods from the recommendation videos that viewers watched with admiring amazement. Rods that don't break even under giant fish. Based on an agreement with one of the best Chinese rod manufacturers, we were the first to start presenting and distributing these rods in Hungary. After the presentation, at the Carp Show exhibition, almost the entire size range could be tested, lifting huge weights with the rods.

In China, the number one fishing method is spod fishing. We already experienced this in 2004 when we were there for an international competition. Huge bighead carp and black amur were caught with these rods. For rod manufacturing, they use carbon fabric from the Japanese Toray company, also bound together with the company's own resin. Rod manufacturing equals the highest level of aircraft part manufacturing. This makes these rods extremely light and flexibly strong. The drawing also shows the well-designed manufacturing layer order of the rod blanks. This needs no explanation. The table shows the magnitude of weight (fish pulling force, weight) that can be lifted with the rods. However, like any rod, this can also break (somehow). As with long spod rods generally, for these too, the use of a long-handled landing net or assistance from a fishing partner is recommended when a truly large fish needs to be lifted ashore.

## CHAOYUE FISHING RODS

POWERFULL *Limite*

Chao Yue Beyond Limite ultralight, high-load designed fishing rod for amur and specimen carp fishing. The T1100, M40X, and 40T carbon blank's 49% carbon content provides excellent strength-to-weight ratio and fast reaction. Its fast action and powerful lower section provide confident control during playing. Clean appearance and balanced construction offer a real premium feel.

Action: 28

Material: T1100+M40X+40T

Recommended fish weight: max. 25 kg

## DUPLEX WAFTERS

For Duplex wafter hookbaits, based on our competition experience, we placed particular emphasis on colors, color combinations, as well as flavors and flavor harmonies. For effectiveness, besides color, the bait's balance and buoyancy are very important, which for this product family have been precisely adjusted. Available in the three most commonly used sizes, in 30g packaging. The storage tub lid seals airtight, so there's no need to worry about the bait drying out either.

## ALLSORTS TOURNAMENT WAFTERS

- TM328 Allsorts Tournament Wafers 8 mm
- TM329 Allsorts Tournament Wafers 10 mm
- TM330 Allsorts Tournament Wafers 12 mm

## Allsorts TOURNAMENT Wafers

Top Mix Allsorts Tournament Wafers hookbaits are dissolving pellets made based on years of competition experience, containing the most commonly used colors during fishing sessions in one tub. Mixed white, lemon yellow, orange, and pink colored wafers are found inside. Every particle inside is dumbbell-shaped, sizes 8, 10, and 12 mm. The sweet wafers received white chocolate aroma, which according to our experience proved attractive in every season. Their buoyancy is very small so they can be used with light and small hooks, as well as fine hair rigs.

Product specifically made for competition anglers, but due to its space-saving nature and attractiveness, also an excellent choice for hobby fishing sessions!

**Redodo LiFePO4 Batteries and Chargers**

- Redodo LiFePO4 battery lifespan is 10 years, while lead-acid is 3 years.
- For example, Redodo 12V 100Ah lithium batteries weigh only 11 kg, space-saving, easily movable and installable, while lead-acid batteries are typically triple the mass, 35 kg, bulky and large.
- Lithium battery voltage is more stable than lead-acid batteries.
- LiFePO4 battery is the latest generation of battery technology, widely used worldwide, such as in e-bike and e-bus programs.

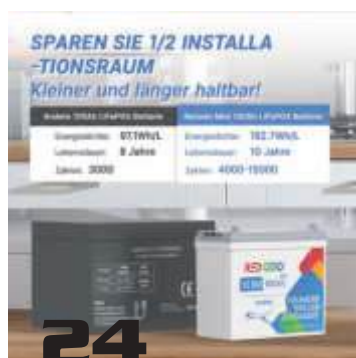

**Batteries:**

- TM2022 - Redodo LiFePO4 12V 100Ah
- TM2029 - Redodo LiFePO4 12V 100Ah Group24 BlueTooth battery

### MagicCorn

TOP MIX MagicCorn corn imitation (fake corn) possesses properties that, with proper bait presentation, make it irresistible to fish. Deceptive similarity to real canned corn, excellent floating ability and intense flavor characterize this product. Its flavor and aroma are unique, plus it comes in a practical tub from which it can be scooped with a small spoon. The tub contains 3x25pc corn kernels of different sizes: medium ("M") size typically the size of canned corn, the larger size ("L") can serve for selecting smaller fish, the small size ("S") is a true competition size, which we use when we want to catch fish, regardless of size. If we need a larger bait, we can even thread two kernels onto the appropriately sized hair rig.

3 different sizes in 1 package!

### AQUA Garant Ready To Use Pellets

The **AQUA Garant Ready To Use** product family is the ready-to-use version of Aqua Garant's most popular pellets. The product **can be loaded directly into the feeder straight from the opened bag**, requires no preparation, thus an ideal choice for quick fishing sessions and competition conditions too.

The pellets have a **crumbly consistency**, possess fast breakdown, thus develop active, intense attractant effect in the water in a short time. If a **stickier mix** is needed, they can be easily adjusted to the given fishing method with the addition of a **minimal water spray**. Their content is based on selected, premium quality ingredients: **fish and vegetable proteins, carbohydrates, vegetable oils, and attractive aromas ensure natural food effect and lasting interest**. AQUA Garant Ready To Use pellets are excellently applicable for method and feeder fishing, on both still and running waters.

Aqua-Garant pellets are produced by the Austrian Garant Tiernahrung factory for the Central and Eastern European markets. The most modern technology, use of highest quality ingredients, in-house laboratory, as well as ISO and HACCP certifications guarantee GMO-free, high-quality fish feed for multiple fish species.

**AQUA DYNAMIC Trout Pellet**

Fast-dissolving trout pellet from Aqua Garant. Excellent for method feeder, PVA mesh too.  
Available: 2 - 4 - 6 mm size, 800g and 25kg packaging.

**AQUA UNI Trout Pellet**

The most successful Aqua Garant pellet among anglers, competition anglers. Characterized by strong fishy scent, high nutritional value, and excellent dissolution. Can be used directly soaked into method feeder.  
Available: 2 - 4 - 6mm size and 800g and 25kg packaging.

**AQUA CLASSIC Carp Pellet**

The most well-known Aqua Garant pellet among anglers. Its composition alone is very attractive to fish, but it's also excellently flavorful.  
Available: 2 - 4 - 6mm size and 800g and 25kg packaging.

**AQUA START**

The AQUA START 1.5mm pellet is AQUA GARANT company's highest quality pellet, as it was originally made for fish fry, where juvenile fish require the best quality feed. In fishing, however, it particularly shows its effectiveness under competition conditions. Possesses extremely high nutritional values, spiced with some attractor, under whose effect fish start feeding even more intensively.

**AQUA VITAL SWIM**  
Made using premium quality fishmeal, extruded floating pellet, for carp surface fishing.  
Available in 6mm size, 800g and 25kg packaging.

**AQUA Catch Drilled Pellet**

Excellent for use as hookbait, but also for feeding. Strong fishy scent, oily texture, and equally successful for carp and catfish.  
Available: 20mm drilled size, 800g and 25kg packaging.

**AQUA MIX CUD 2**  
 Appropriate ratio mix of Aqua Classic, Aqua Uni, and Aqua Dynamic 2mm pellets, made for carp fishing. Can be used directly for feeding, in ground form for method fishing, for paste making, or soaked into method feeder.

**AQUA MIX4 CUD 4**  
 Appropriate ratio mix of Aqua Classic, Aqua Uni, and Aqua Dynamic 4mm pellets, made for carp fishing. Can be used directly for feeding, in ground form for method fishing, for paste making, or soaked into method feeder.

**AQUA MIX CU 2**

Appropriate ratio mix of Aqua Classic and Aqua Uni 2mm pellets, made for carp fishing. Can be used directly for feeding, in ground form for method fishing, for paste making, or soaked into method feeder.

**AQUA CLASSIC Red 2**  
**AQUA CLASSIC Red 4**  
 The most well-known Aqua Garant pellet among anglers, the red-colored version made exclusively for us by the manufacturer. Besides its composition, its color is also very attractive to fish, but it's also excellently flavorful. Available: 2 and 4 mm size, 800g packaging.

**AQUA MIX CU 4**

Appropriate ratio mix of Aqua Classic and Aqua Uni 4mm pellets, made for carp fishing. Can be used directly for feeding, in ground form for method fishing, for paste making, or soaked into method feeder.

**AQUA Crushed Uni**

The crushed version of the most successful Aqua Garant pellet among anglers, competition anglers. Characterized by strong fishy scent, high nutritional value, and excellent dissolution. After proper wetting, can be used directly in the method feeder, the perfect solution for coating pellets too.

**AQUA Crushed Classic**

The most well-known Aqua Garant pellet's crushed version. Its composition alone is very attractive to fish, but it's also excellently flavorful. After proper wetting, can be used directly in the method feeder, the perfect solution for coating pellets too.

**AQUA Crushed Red**

Crushed Aqua Garant RED pellet. Made using specially colored-in-material Aqua Garant pellets. Can be used alone or mixed with pellets according to season and water. Also excellent as additive to carbohydrate-based baits, or coated, wrapped together with pellets.

## AQUA Betain Complex

Popular bait among anglers made from Aqua pellets with special additive containing betaine and colorants alongside the high protein content in the pellets. Betaine is naturally derived appetite stimulant. Widely used additive to increase attractant effect. In food recognition, fish mainly rely on their olfactory organ, which is stimulated by certain amino acids dissolving in the water, as well as betaine. Betaine triggers feeding stimulus, hence used for feeding intensively kept fish.

Upon hitting water, creates spectacular fog that grabs fish attention already during sinking. Aqua Betain Complex comes in five colors to stand out well from the bottom. Under competition conditions when bite intensity wanes, a new color shade can reinvigorate fish's decreasing willingness to bite. The Aqua Betain Complex product family was created for such situations.

Rigó Edit

- TM554 AQUA Betain Complex Orange
- TM560 AQUA Betain Complex White
- TM561 AQUA Betain Complex Yellow
- TM562 AQUA Betain Complex Red
- TM563 AQUA Betain Complex Green

## Aqua Wafers

AQUA pellets and their grinds are the most defining baits for method feeder anglers. Accordingly, we created these unique wafers for those feeder anglers who like attractive dissolving hookbaits. Lightened pellets, but just enough so they can be used with fine hair rigs and #14 hooks even with the smallest 8 mm sizes. Their base material is a mix of Aqua Classic and Classic-Uni pellets, so their protein content is also high, 37-45%. Both variations are available in 8 - 10 and 12 mm sizes too. Dissolution ability is intense, "open bait," so its nutritional value also lures fish arriving around the feeder.

- TM564 Aqua Wafers Classic 8mm
- TM565 Aqua Wafers Classic 10mm
- TM566 Aqua Wafers Classic 12mm
- TM576 Aqua Wafers Classic-Uni 8mm
- TM577 Aqua Wafers Classic-Uni 10mm
- TM578 Aqua Wafers Classic-Uni 12mm

## Aqua Boilie

High-quality boilie made from AQUA GARANT pellet grind using special process. Open, dissolving boilie with outstanding protein content of 37%, paired with balanced protein and carbohydrate ratio. Special carp delicacy, whose main consideration during creation (besides its attractant power) was digestibility, fish protection, thus we omitted all artificial aromas, preservatives, and additives. Dissolution time 4-6 hours, but already after one minute shows spectacular particle shedding; the thus dissolving base materials quickly exert their attractant effect.

- TM527 Aqua Boilie 20mm
- TM528 Aqua Boilie 24mm

## Tastes of old times

- TM285 Retro Aqua Method Spray - Paprika Bread
- TM286 Retro Aqua Method Spray - Plum Pálinka
- TM287 Retro Aqua Method Spray - Garlic Langos
- TM288 Retro Aqua Method Spray - Honeycomb Honey
- TM289 Retro Aqua Method Spray - Danube Gravel

### Retro AQUA Method Spray

Retro AQUA Method Spray is an extremely concentrated aroma concentrate for quick external aromatizing and coloring of hookbaits, pellets, and baits. With its use, attractant effect can be significantly enhanced in a short time, with explosive results with proper application.

Fine spray creates even coating while not changing the bait or pellet's consistency, so feeder breakdown and bait action remain undisturbed.

The product evokes the proven, classic flavor world of old times, creating natural food association in fish, therefore particularly effective on heavily fished, high-pressure waters. Primarily recommended for AQUA pellets and method baits, but also successfully usable with other hookbaits and baits.

### AQUA Nitro Boost Gel

Aroma gel developed for method feeder fishing, specifically for Aqua Garant pellets, but also effectively usable for fine tackle or ribbed cage feeder methods. Only imagination limits its application area, equally suitable for aromatizing and coloring sweetcorn, flavoring maggots, or even turbocharging PVA bags.

The thick aroma gel spreads horizontally on the bottom, exerting its strong smoky effect on the bottom so the flowing water doesn't carry the fish away too far. Its intense aromas lure nearby fish to our feeder, thereby allowing us to tempt them to bite faster. PVA-friendly product! Available in seven flavors.

- TM109 AQUA Nitro Boost Gel Pineapple
- TM110 AQUA Nitro Boost Gel Garlic-Fried Liver
- TM111 AQUA Nitro Boost Gel Krill-Mussel
- TM112 AQUA Nitro Boost Gel Strawberry Cream
- TM113 AQUA Nitro Boost Gel GLM
- TM115 AQUA Nitro Boost Gel Sweet Mango
- TM116 AQUA Nitro Boost Gel Durian - Squid

### AQUA Method Sray

AQUA Method Spray is a concentrated aroma concentrate for quick, external aromatizing and coloring of hookbaits, pellets loaded into feeder, baits. The effect can be explosive! We primarily developed the spray for the most commonly used AQUA pellets in method fishing and method baits made using these, but this doesn't exclude successful use with other baits and pellets.

- TM472 Pineapple-Butyric Acid
- TM473 Strawberry Cream
- TM475 Garlic-Fried Liver
- TM476 Krill-Mussel

### AQUA Method Crumb

In Method fishing, it often happens that the pellet mix used needs to be changed to achieve bites, or even more bites, by accustoming fish to the hookbait color. Then a little method crumb needs to be added to the pellet mix. A few different, conspicuous particles among the pellets loaded into the feeder arouse fish curiosity. They will search for these colors, and if our hookbait color matches the crumb color, we'll get bites faster.

TM216 AQUA Method Crumb fluo orange

TM217 AQUA Method Crumb fluo yellow

TM218 AQUA Method Crumb fluo red

### AQUAroma Booster for Aqua pellets

Special aroma blend primarily for AQUA pellets. According to test results, bottle content is sufficient for aromatizing 400g of pellets or pellet mix. Simple to use: pour onto pellets, then wait 15-20 minutes until loading into feeder. However, it's recommended to mix bottle content into pellets in two portions for better breakdown.

TM435 Strawberry Cream

TM436 Mango

TM437 Chocolate-orange

TM438 Pineapple

TM439 Garlic-Fried Liver

TM456 Sweetcorn

TM458 Cheese

Nagy Dezső

### AQUA CSL Booster

Special CSL aroma blend primarily for AQUA pellets. This CSL Booster also contains a low percentage of alcohol, due to which it excellently exerts its attractant effect even in cold water. Due to its high protein and energy content, carp are particularly tempted by it. Garlic creates fluo green cloud, strawberry cream fluo red, while other flavors create natural brown cloud around our feeder.

TM450 AQUA CSL Booster Sweet Mango

TM451 AQUA CSL Booster Squid

TM452 AQUA CSL Booster Natural

TM453 AQUA CSL Booster Liver

TM455 AQUA CSL Booster Garlic

TM457 AQUA CSL Booster Strawberry Cream

**Top Mix Pre-digested** seeds are made using a pre-digestion process, a process not new in the field of animal feed, and this applies to fish feeding too. One such process is treatment with digestive enzymes after cooking, technically relatively easy to implement yet requires huge experience and expertise. However, its attractant effect is unquestionable.

The prepared seeds, packaged in food industry protective gas packaging, retain their freshness for a very long time even without preservatives, thereby their attractant effect. Pre-digested seeds don't satiate fish, provide fast metabolism, so they constantly return to the feed.

Corn, wheat, and their special mixes supplemented with other seeds, compiled for carp and amur, are also available in our range.

## PRE DIGESTED

- TM584 Pre Digested Corn
- TM585 Pre Digested Wheat
- TM586 Pre Digested Carp Mix
- TM587 Pre Digested Amur Mix
- TM592 Pre Digested Corn-Hemp

Varga Róbert

### Corn TURMIX

Mashed form of crushed (80%) corn, (10%) wheat, and (10%) rapeseed, flavored, colored. In carp fishing, we often use the mashed version of seeds, primarily corn, whose preparation is quite cumbersome. With this product's use, from now on there's no need to waste time performing the otherwise quite fiddly preparation process of seed additives ourselves; now we find all this in a single preparation. We get a perfect mix if we mix the turmix with dry bait.

### TM499 Feeder MAG-MIX

Primarily developed for long-legering feeder fishing, but usable for other methods too. Feeder mag-mix is a wet mix of chopped seeds. After opening, before use, it needs to be crumbled so it falls into pieces. Then it can be pressed directly into feeder cage. Its attractiveness can be enhanced by mixing in 2-4mm pellets. If a lot of seeds need to be introduced with feeder cage, this is the best choice. Also usable mixed into bait or just scattered alone.

- TM490 Corn Turmix Natur
- TM491 Corn Turmix Honey
- TM492 Corn Turmix Strawberry
- TM493 Corn Turmix Large Carp
- TM494 Corn Turmix Butyric Acid

### TM196 TOP MIX SWEETENER

Sweetening baits is common. The sweetener gives no extra scent or aroma to our bait, but imparts a sweet flavor that no other additive can! Dosage is a matter of taste, but truly effective in warming up and cooling down waters. Tub content is sufficient for sweetening 100 kg of bait.

### TM194 TOP MIX BAIT COLORANT BLACK

For coloring baits, hookbaits. Very strong dyeing effect, therefore typically little is needed. Important: must be mixed into the dry material. With its dosage, we can dye our bait, hookbait from gray shades to complete black. Tub content is sufficient for dyeing 60kg of bait black.

### Pastoncino

TOP MIX Pastoncino is a special additive. Which is nothing but an oily, sinking, lemon-aroma treated, sweet, medium particle size "heavy crumb" and nigerseed mix. Emphasis is on the extremely intense lemon aroma, effective mainly in warm summer waters. Fish eat the tiny (red or yellow) particles flowering in the disintegrating bait. The tasty morsels keep them at the fishing spot for a long time. In its homeland, Italy, it's an indispensable component of chubby, carp mixes. In our country, it cannot be missing from good chub mixes either. Use the yellow-colored in murky, the red-colored in clear waters.

TM222 Pastoncino red

TM223 Pastoncino yellow

### Szakács Milán

### ENGLISH CRUMBS

Red and yellow colored, high-quality sinking crumb from Italy. Every fish species likes it and preferentially picks it out from among other bait particles. Therefore advisable to mix into every bait at 2-10%.

TM201 English crumb red

TM202 English crumb yellow

TM205 English crumb red-yellow

### TM102 Cold-pressed corn germ pellet

### TM210 Tourteau de mais

### TM208 Tourteau de mais, ground

TOP MIX Tourteau de mais is an extra quality, large-piece, higher oil content corn cake manufactured in Italy, which we dose into bait soaked, possibly mixed with aroma. Usage: soak at least half an hour before fishing, preferably add 2 liters of water, possibly aroma to one bag's content, then continuously mix into 4-5 kg of dry bait. Recommended for all fish species, but particularly favored by chub, carp, and crucian carp. Ground Tourteau de mais advantage is that it soaks much faster, thus usable sooner than its chunk version. Pellet made from Tourteau de mais is directly usable for feeding.

### FLUO CRUMBS

Special and unique additives are these fluo colored crumbs. Thanks to their extremely vibrant color and very fine sweet flavor, they provide excellent attractant effect. Even in murkier, darker waters the particles are visible, enhancing flavor effect with visibility effect. During tests, it clearly emerged that despite their conspicuous color, they don't scare but increase fish curiosity, enhancing bait attractiveness. Well usable in river fishing too.

# FLUO

TM224 Fluo crumb yellow

TM225 Fluo crumb orange

TM226 Fluo crumb red

TM227 Fluo crumb green

TM228 Fluo crumb mixed

Tomislav Grgetic

**TM230 Cheese Powder**  
100% dried Parmesan cheese grind. Additive for barbel baits. Mixed with soaked bread, we get ready barbel delicacy. Boilie anglers also use cheese in warm summer period, so it's worth going a bit crazy with carp baits with a little cheese too. Recommended usage ratio: 5-30%.

**TM234 Terre de riviere - Black**  
**TM236 Terre de riviere**  
Dark brown colored, greasy, slowly dissolving, heavy clay, for bottom and river fishing. Usage mixed into baits at 5-50%, also for introducing maggots into water. From the two clay mixes, clay of any desired consistency can be mixed.

**TM235 Terre de somme**  
**TM233 Terre de somme - Black**  
Light brown colored, loess content clay, which dissolves quickly in water, thus suitable for cloudy feeding too. Usage mixed into baits at 5-50%, also for introducing maggots into water.

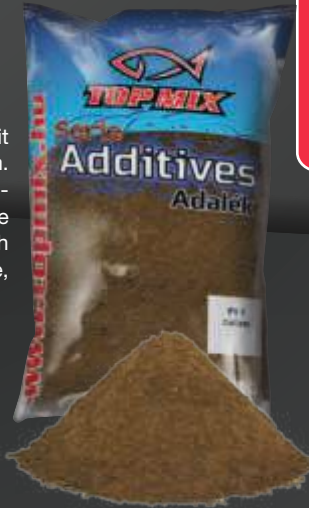

**TM238 Washed gravel, 1.6 - 3 mm**  
Water-cleaned, evenly grained gravel. Usage for weighting when binding bait, maggots, and seed material.

**TM280 TOP GUM Maggot binder, 200g**  
100% gum arabic, arriving from Saudi Arabia. The best maggot binder. Due to its great binding power, little is needed. Dissolves quickly in water. At the 2005 European Championship, Alan Scotthorne and the English team also used this.

**TM212 PV 1 Collant**  
High nutritional value bait binder imported from Belgium. Recommended usage ratio: 5 - 20%. Higher value should be used in running water. Fish species: carp, chub, dace, barbel.

**TM215 Fishmeal**  
North Sea, high-quality sea fish-made meal. Due to its high nutritional value, can be mixed into almost every carp bait, primarily advisable to use in warm-natured waters.

**TM237 Maggot Separator Powder**  
Dark brown loess dry, very finely ground powder version. Excellent for separating maggots. By sprinkling a small amount onto maggots, gently mix with it. If the maggot was fresh enough, it breaks it into strands and keeps it alive for a long time, as it's completely natural material. Also suitable for drying back over-wetted loess. 250 g

**Bait and Seed Material Binders**

Corn-based binding material for bait and seed material binding, available with several flavorings. Almost anything - can be bound together with anything with it. E.g.: maggots can be bound together with corn and gravel. Advisable to mix into bait even in its dry state.

**TM270 Natural**  
**TM272 Vanilla**  
**TM273 Honey**  
**TM274 Strawberry**

# STRONG + SOFT = STROFT

Strong, yet Flexible

RELIABLE, STRONG AND DURABLE FISHING LINE FOR EVERY SITUATION

### STROFT's goal: the best fishing line with the most modern technology.

- More than 40 years experience exclusively in line manufacturing.
- Continuous cooperation with research and development departments.
  - Own tests and measurements ensure high quality.
  - Products are continuously developed, without name change.
  - A product goes through several dozen developments during its lifetime.

Result: *technical superiority in practice.*

The line range's centerpiece is the polyamide alloy-made, monofilament **STROFT GTM**.

This line is an **optimal compromise** for every fishing area and type.

All other STROFT premium lines are special lines: **each emphasizes one property more strongly than GTM**. Primarily for this reason, we recommend **STROFT GTM** to everyone since this line offers a good solution for almost every application.

#### Basic model: STROFT GTM

- Universal monofilament line
- Made from polyamide alloy
- Strong, flexible, durable
- Ideal for beginners and advanced alike
- Usable for almost every fishing type

#### Special Lines – for special needs

- |  |  |   |
|--|--|---|
| <b>STROFT color</b> <ul style="list-style-type: none"> <li>• Well visible line (day, night, winter)</li> <li>• Extra bite detection</li> </ul> | <b>STROFT LS</b> <ul style="list-style-type: none"> <li>• Minimal stretch</li> <li>• Abrasion-resistant</li> </ul> | <b>STROFT ABR</b> <ul style="list-style-type: none"> <li>• Extra bite detection</li> <li>• Good for snaggy, rocky places</li> </ul> |
|--|--|---|

#### Fluorocarbon Lines

##### STROFT FC1 / FC2

- Almost invisible in water
- Very abrasion-resistant
- Excellent for hooklinks
- FC2 more flexible, easier to tie

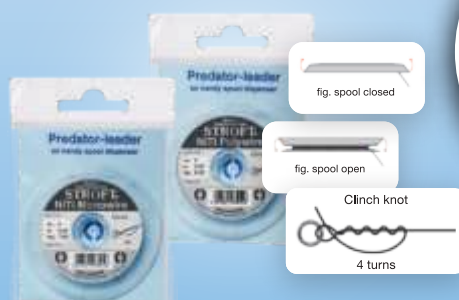

#### Braided Lines (GTP)

##### Type R / E / S

- Extremely strong
- Doesn't stretch
- Precise casting and control
- For sport and predator fishing

## STROFT® NiTi Monowire & Polywire

NiTi (nickel-titanium) is a special metal alloy that regains its original shape even after strong bending. Therefore excellent base material for predator hooklinks. STROFT specifically developed its NiTi wires to be simple, quickly, and securely tied.

- Simple **Clinch** knot
- Already **4 turns** enough
- No special tool needed
- Quick and clean tying

#### ADVANTAGES

- Very high bite resistance
- Superelastic – doesn't break
- Shape memory ("memory")
- Good knot strength
- High knot breaking strain
- Smooth, reflection-free surface
- Long lifespan

#### STROFT NiTi Monowire

- Slightly stiffer
- Simpler construction
- For very strong hooklinks

#### STROFT NiTi Polywire

- More flexible
- Silky feel
- Easier handling

### TM978 Top Mix D36 Feeder Box

Light, practical, space-saving tackle box.

- Solid, stable, welded aluminum construction: tested up to 130 kg, didn't even budge!
- Practical storage compartments, side drawer, top (40mm) storage under seat, lower deep (130 mm) storage that absorbs every small item.
- Comfortable (42 x 30 cm) seating surface, as fishing is not just sport but also relaxation!
- D36 legs for maximizing stability.
- Padded shoulder strap for easy carrying
- Weight only 7 kg!
- Dimensions: h: 64 x w: 42 x d: 50cm, adjustable.

### TOP MIX Stradivari Carp 360 Landing Net Handle

Threaded system, strong, carp-specific, yet slender landing net handle. The handle's middle section also has threaded end, so usable as shorter, extra specimen landing net handle. Variable in 210 - 280 - 360 length, thus usable under almost any conditions.

### TOP MIX Stradivari Landing Net Handles

Threaded system, sufficiently strong, yet extremely slender, easily handled landing net handle with 2 - 3 and 4 m painted sections. Suitable for fast small fish fishing or landing 2-3 kg carp.

### TOP MIX feeder Feeder Rod Rest

First and rear, practical design, rubber-coated rod rests for feeder and match rods, for every situation.

# STRADIVARI

Tournament Match 390 / 420

## Top Mix Stradivari Match

The **Top Mix Stradivari Match** series represents in renewed form everything a high-level match fishing rod should know. Using modern materials and manufacturing technology, an extremely light, slender, and crisp character rod family was born, serving demanding match anglers without compromise.

The butt and middle sections are made from TORAY XT40 carbon, while the tip section from XT46 carbon, providing excellent sensitivity, fast reaction, and precise casts. The rod blank received raw carbon surface treatment, glossy finish only under technical inscriptions.

The ring set consists of Japanese-made SeaGuide rings, the reel seat is Fuji. The bottom mixing ring is 12 mm, and an SIC insert hook keeper eye also found place on the rod blank.

The cork handle's flattened design provides stable grip in hand and when rested on thigh. Low mass, slender butt section, and crisp action clearly represent top-category quality.

HIGH PERFORMANCE CARBON FIBRE

# Stradivari TOURNAMENT

HIGH PERFORMANCE CARBON FIBER  
**TORAYCA**

## Stradivari Tournament

The creation of the new Stradivari Tournament feeder rod family is linked to the name of five-time team and individual world champion and five-time Hungarian Champion Papp József, who also dreamed up the famous Stradivari rods about 20 years ago.

We primarily recommend these rods to practiced and pro feeder anglers, mostly for long-legering and fine method techniques. Every member of the series maximally holds its own even on breath-delicate experience sessions or pro fishing competitions. These are the rods that will surely turn heads on the bank and provide a playing experience that few feeder rods have given so far.

What does the rod offer? The slimmest rod blank ever on the market, yet characterized by extraordinary speed and never-seen flexibility characterizes the perfect characteristic feeder rod. This performance was achievable using Japanese TORAY carbon base material.

The thin, graceful rod blank is fitted with extremely light, long-lasting, and elegant American Guide rings. The tip rings are three-legged, which reduce the risk of line twist and don't bend back and then break in the transport tube. The rod handle received cork - EVA ergonomic grip. Due to its design, it doesn't slip off even from steeper rod rests. The seamless reel seat is a product of the Japanese FUJI company. Every rod comes with 3 different strength (0.75-1.0 and 1.5 oz) quiver tips, each receiving well-visible white coloring. The white color never fades and is well visible in every light condition. Their strength is written in gold color on every tip.

Come in an elegant burgundy case with separate external pocket for tips.

Code	Length	Casting Weight	Diameter	Weight	Tip	Transport Length
TM610	3.30 m	30 g	9.5 mm	195 g	0,75-1-1,5 oz	115 cm
TM612	3.60 m	35 g	10 mm	225 g	0,75-1-1,5 oz	125 cm
TM615	3.90 m	80 g	10.5 mm	290 g	0,75-1-1,5 oz	135 cm

390 - 80g

### Stradivari Method Feeder

Rod material is high-quality 30T carbon. The used material's excellent properties make the rods light, crisp, and very handy. During rod design, we paid great attention to making fishing a pleasure with it and minimizing the possibility of losing fish. The rods have "front end" for playing and sufficiently strong backbone even in shorter lengths. This backbone-ness is what enables precise, distant casts with longer versions, preserving the playing-given experience. Among the lightest in their category, thus making fishing comfortable. The finest 3.30 and 3.60 rods have single-legged raised, while the stronger 3.90 and 4.20 have two-legged today's expectation meeting high-quality SeaGuide rings. Rod surface is "rawcarbon," while under inscriptions received glossy lacquer finish. Handle length provides comfortable rod handling, while its material -EVA and cork combination-provides pleasant grip. Handle end is closed by hard cork and the rods also have a hook keeper.

The tips received triple-support tip rings, thus they don't bend and casting also has less twisting, thereby also the possibility of tip breakage.

Code	Length	Sections	Cast. Weight	Weight	Tip	Trans. Length
TM650	3.30	3+3	60 g	180 g	1-2-3 oz	117 cm
TM651	3.60	3+3	70 g	216 g	1-2-3 oz	127 cm

TM615	4.20	3+3	120 g	340 g	2-3-4 oz	147 cm

# DISTANCE FEEDER

390 / 420

HIGH-PERFORMANCE CARBON FIBER

# TORAYCA

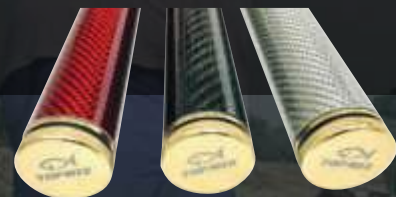

## DISTANCE Feeder Rods

Feeder rod specifically developed for fishing large distances, in 390 and 420 lengths. TORAY carbon blank made using high-quality materials, the most fitting SEAGUIDE ring set, and casting-optimized handle length guarantee that with this feeder rod, no distance is unreachable. In practiced hands, 150-170m is achievable with the 420 version, while with the 390 long version, 120-140 meters can be cast.

For those eyeing distance casting competitions too, definitely worth considering this 4.20 m feeder rod, as at the 2022 Distance Casting Competition, 207 m was cast with this rod! Also recommended for those who want to fish long distances, over 100 meters, under hobby or competition conditions. A long test period preceded store appearance, as test samples of these rods already appeared at the 2021 Method club team championship at Lake Maconka, where the Top Mix team won the championship title using them. Their final form was also achieved at the same championship and location in 2022, where team members again stood on the podium. Distance feeder rods are crisp, strong, yet slimmer than their similar counterparts.

**EVERY DISTANCE FEEDER ROD COMES WITH A FREE CARBON QUIVER TIP HOLDER!**

Code	Length	Sections	Casting Weight	Weight	Tip	Transport Length
TM626	3.90 m	3+3	60-120 g	360 g	3-4-5 oz	135 cm

### T-Rex Method Feeder

Rod material is high-quality 24T carbon. Thanks to the material's excellent properties, the rods are light, crisp, well loadable, and very handy. During rod design, we paid great attention to making fishing an experience with it, minimizing the possibility of losing fish.

As a result of perfectly tuned characteristics, we can easily and precisely fish the desired distance with the rods and don't have to fear losing fish even when fishing with small hooks and thin hooklinks. Among the lightest in their category, thus making fishing comfortable. The rods are two-legged, fitted with today's expectation meeting high-quality SeaGuide rings. Rod surface is matte black lacquered. Handle length is optimal for casting, while its material -EVA and cork combination- provides pleasant grip. Above the handle, on the rod blank, a hook keeper tab was also fitted. The tips received triple-support tip rings, thus they don't bend and casting also has less twisting, thereby also the possibility of tip breakage.

The T-Rex Method Feeder rod family comes in 3.60 - 3.90 and 4.20 meter lengths, offering perfect solution for most situations.

Code	Length	Sections	Casting Weight	Weight	Tip	Transport Length
TM602	3.60M	3+3	80 g	235 g	1,5-2-3 oz	125 cm
TM603	3.60MH	3+3	100 g	240 g	1,5-2-3 oz	125 cm
TM605	3.90H	3+3	130 g	280 g	2-3-4 oz	135 cm
TM606	3.90XH	3+3	150 g	286 g	2,5-3,5-4,5 oz	135 cm

# T-REX RIVER FEEDER

*Reel*

## T-Rex River Feeder

The T-Rex River Feeder rod family is made using 24T Carbon base material. Thanks to good quality material, the rods became extra strong, light, flexible, and well loadable. We can boldly declare that during intended use, these rods are unbreakable! As a result of perfectly tuned characteristics, we can easily and precisely fish the desired distance with the rods and don't have to fear losing fish even when fishing with small hooks and thin hooklinks. The rods received an elegant finish, sufficiently long, high-quality cork and EVA combination, very comfortable grip handle, on which a strong reel seat serves proper reel fixing. The rods are fitted with today's expectation meeting two-legged, high-quality SeaGuide rings. Above the handle on the rod blank, a hook keeper tab was also fitted. Although rods weren't specifically made for distance casting, with the 4.20 rod, officially measured at the Distance Casting Competition, 165 meters were cast. The rods come with three different strength, 2-3 and 4 oz tips. T-Rex River Feeder rods come in 3.90 and 4.20 meter lengths, offering perfect solution for river bank anglers.

Code	Length	Sections	Casting Weight	Weight	Tip	Transport Length
TM608	3.90HH	3+3	300 g	335 g	2-3-4 oz	135 cm
TM609	4.20HH	3+3	300 g	370 g	2-3-4 oz	146 cm

# ASTERX METHOD FEEDER

## AsterX method feeder

In 2023, we not only favor competition anglers with a new feeder rod family, but also thought of general carp anglers. Within this, the AsterX method feeder rod family was developed for those anglers who like sensitive bites and playing with slender, flexible rods. All this with quality equipment but at an affordable price! The AsterX rod family's weight and slenderness are unbeatable in this price category. Additionally, it retained that crispness so casts remain accurate, the rod isn't "stretchy," but during playing, its flexibility also reacts to vehement runs. Similar to the Tournament rod family, AsterX rods also received light American Guide rings, and naturally the tip ring also has reinforced legs.

Code	Length	Casting Weight	Diameter	Weight	Tip	Transport Length
TM695	3.30 m	60 g	11,8 mm	184 g	1-2-3 oz	115 cm
TM696	3.60 m	80 g	12.2 mm	210 g	1-2-3 oz	126 cm
TM697	3.90 m	100 g	12.5 mm	250 g	1-2-3 oz	136 cm

## ASTERX REEL SERIES

*Reliable performance for every fishing*

Whether it's bottom fishing, feeder, or match rod fishing, AsterX reels will be your faithful companions on the bank. During design, special attention was paid to durability, comfortable use, and reliable operation so you can confidently rely on them long-term. The shallow metal spool, precise front drag, and smooth running all contribute to accurate casts and efficient playing.

### *Common characteristics*

- Shallow design metal spool, two metal pieces, with spring line clips
- Fast, non-slip front drag system
- Anodized aluminum reel body for long lifespan
- Screw-in handle for maximum stability
- Airball (hollow) bail arm for balanced operation
- 10+1 bearings for extremely smooth running
- Fabric reel pouch for safe transport

#### **AsterX 5500 Reel**

With its larger size and line capacity, the AsterX 5500 is an excellent choice for stronger feeder or bottom fishing, longer casts, and larger loads. Its stable construction and larger spool diameter provide more efficient line handling.

#### **Technical data:**

- Gear Ratio: 4.6 : 1
- Weight: 377 g
- Spool Diameter: 63 mm
- Line Retrieve: 94 cm / turn

#### **AsterX 4500 Reel**

The AsterX 4500 is an ideal choice for medium feeder and match fishing, when balance between performance and weight is important. Despite its compact size, it has a powerful, finely adjustable drag system and precise line retrieve.

#### **Technical data:**

- Gear Ratio: 4.6 : 1
- Weight: 362 g
- Spool Diameter: 58 mm
- Line Retrieve: 88 cm / turn

AsterX reels are made for anglers looking for reliable, durable, and technically matured equipment – without compromises.

## Reel SPIN I II III

  
TOP MIX

### Spin I-II-III

You'll feel the secret of Stradivari spinning rods the first moment you pick them up! The rods are premium category, where quality and performance know no bounds! The Stradivari Spin spinning rod series consists of three, L - ML and M, types. Each model is an independent character, accordingly the types' unique identifier is readable on the butt section. The new Stradivari Spin rods are made from 30T and 40T TORAY Carbon, with elegant raw carbon surface, possess fast action, are light, flexible, have backbone, and are very sensitive. The light "Fuji Alconite" K-series ring set provides great abrasion resistance and perfect line run, contributing to the largest possible casts!

The reel seat is also FUJI!

In practiced hands, this rod "plays music" like a wonderful instrument.

## Shiner Worm

For our high-quality STRADIVARI spinning rods, we created a narrower selection from hookbaits judged most attractive by our spinning test anglers. Nine types of small fish (in 76 and 100mm sizes) and three types of caterpillar (60mm) imitations come to market.

The hookbaits are made from the best materials for perfect attractant effect, accordingly they are soft, durable, and perfectly lifelike reproduce predator prey movement, their AminoX flavoring further enhances their attractiveness. Practically successfully usable for every plastic bait method, be it jig, offset, dropshot, etc.

### ARROW PRO Method Feeder

The ARROW PRO method feeder has longitudinally positioned ribs that excellently hold the bait, provide proper place for the hookbait, and reduce hook snag possibility. The forward weight placement, weight shape, form, the most streamlined design compared to previous feeders. The longer stem and the stem's guide wing provide excellent flight, distant and accurate casts for the method feeder. Due to its design, the splash sound upon water entry is also reduced. The gripping bumps formed on the feeder bottom ensure non-slip movement on the bottom for the feeder. According to anglers' needs, method feeders can be removed, exchanged from the line in a moment without breaking down the rig. Providing great freedom for transport, or varying different weight method feeders. For manufacturing the bait-holding feeder's upper part, we used 50% recycled fluoroclear base material.

- TM764 ARROW PRO Method feeder 30g
- TM765 ARROW PRO Method feeder 40g
- TM766 ARROW PRO Method feeder 50g
- TM767 ARROW PRO Method feeder 70g

### ARROW PRO XL Method Feeder

The ARROW PRO method feeder's further developed, larger size and capacity version. Advisable to use when larger quantity bait needs to be introduced, either during base feeding or during fishing.

- TM669 ARROW PRO XL Method Feeder 30g
- TM670 ARROW PRO XL Method Feeder 40g
- TM671 ARROW PRO XL Method Feeder 50g

### TM659 ARROW PRO Silicone Loading Tool

ARROW PRO silicone loading tool is our own development, designed for our ARROW PRO method feeders. The flexible silicone loading tool perfectly fits the ARROW PRO Method feeder. Due to its design, material, and feeder release mechanism, there's no stuck load. Has no moving parts, thus cannot malfunction. Its use enables fast, efficient, and simple loading. Also usable for other, similar size, shape method feeders.

### ARROW Flat EVO Method Feeder

The Arrow Flat Method feeder's further developed version, which differs in that it can be removed from its stem and from the line without breaking down the rig. Its water-clear material doesn't raise suspicion in fish feeding around the feeder. Due to its guide stem and wing, it's stably castable to great distance, doesn't wobble in the air, doesn't lose accuracy even in wind. Its tiny "claws" grip the bottom, so the tightening line also doesn't easily move it from our feed. Its central ribs are angled so it can be used even with larger hookbaits. These feeders are purchasable in L and XL sizes too.

- TM662 ARROW Flat EVO Method feeder L 30g
- TM663 ARROW Flat EVO Method feeder L 45g
- TM664 ARROW Flat EVO Method feeder L 60g
- TM665 ARROW Flat EVO Method feeder L 80g
- TM666 ARROW Flat EVO Method feeder XL 30g
- TM667 ARROW Flat EVO Method feeder XL 45g
- TM668 ARROW Flat EVO Method feeder XL 60g

### ARROW Flat Method Feeder

Based on customer reviews, our two most popular method feeders are the Arrow Pro and the Improved. From crossing these two feeders, the Arrow Flat Method was born, which incorporates both types' best properties. Its water-clear material doesn't raise suspicion in fish feeding around the feeder. Due to its guide stem and wing, it's stably castable to great distance, doesn't wobble in the air, doesn't lose accuracy even in wind. Its tiny "claws" grip the bottom, so the tightening line also doesn't easily move it from our feed. Its central ribs are angled so it can be used even with larger hookbaits. Its universal shape fits most manufacturers' loading tools. These feeders are purchasable in L and XL sizes too.

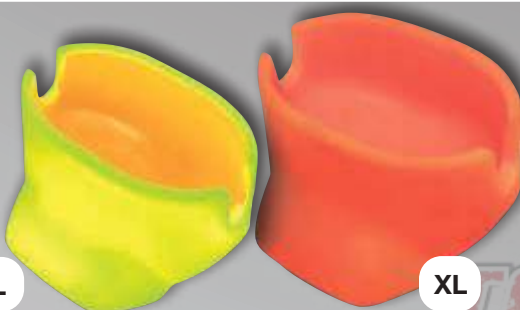

- TM620 ARROW Flat Method feeder L 30g
- TM621 ARROW Flat Method feeder L 45g
- TM622 ARROW Flat Method feeder L 60g
- TM623 ARROW Flat Method feeder L 80g
- TM617 ARROW Flat Method feeder XL 30g
- TM618 ARROW Flat Method feeder XL 45g
- TM619 ARROW Flat Method feeder XL 60g

### ARROW Flat Silicone Loading Tool

The ARROW EVO/Flat silicone loading tool is our own development, designed for our ARROW Flat and ARROW Flat EVO method feeders. The flexible silicone loading tool perfectly fits both feeder types. Due to its design, material, and feeder release mechanism, there's no stuck load. Has no moving parts, thus cannot malfunction. Its use enables fast, efficient, and simple loading. Matching the feeders, comes in two sizes, "L" and "XL". Also usable for other, similar size, shape method feeders.

Sárvári Lajos

L

XL

- TM660 ARROW Flat silicone loading tool "L"
- TM661 ARROW Flat silicone loading tool "XL"

**ARROW 3 and 4 Rib Pellet Feeder**

3 and 4 rib method feeders. During feeder design, we strived for the bottom weight to be larger, thus placing the feeder's center of gravity forward, increasing casting distance and accuracy. The feeder's specialty is also the unique darts wing, which further increases castable distance and provides enhanced accuracy.

- TM641 4 rib ARROW pellet feeder 25g
- TM642 4 rib ARROW pellet feeder 35g
- TM643 4 rib ARROW pellet feeder 45g
- TM632 4 rib ARROW pellet feeder 55g
- TM633 4 rib ARROW pellet feeder 65g

**Improved Method Feeder**

Enhanced flight property, internal guide method feeder. With the guide stem's help, previous method feeders' "spiraling" during casting can be eliminated, thereby increasing casting accuracy and length too. The longer guide stem well guides our line during casting, thereby increasing casting accuracy and even length by up to 15%. Particularly advantageous when needing to fish into a tight spot with great accuracy, or wanting to achieve greater distance with smaller weight feeder. Comes in five sizes, 20-30-40-50-65g.

- TM750 Improved Method Feeder 30g
- TM751 Improved Method Feeder 40g
- TM752 Improved Method Feeder 50g
- TM753 Improved Method Feeder 20g
- TM754 Improved Method Feeder 65g

**TM780 Method Feeder Guide Wing**

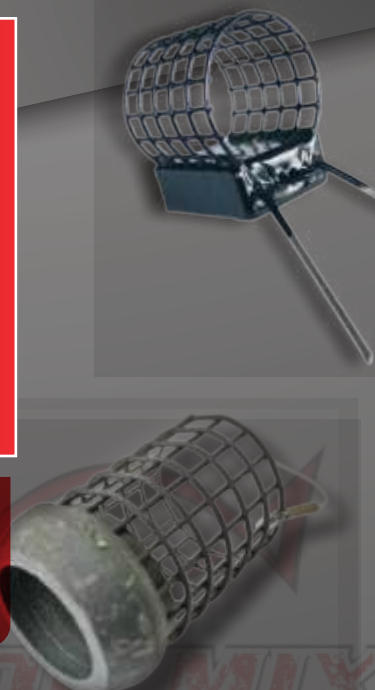

General guide wing for TOP MIX method feeders, but also usable for Preston and other manufacturers' feeders. Simple to use: need to put on the pin at the feeder front.

**TOP DISTANCE Feeder**

TOP DISTANCE feeders are specifically developed for distant, accurate fishing. Since the feeder's lead is not on its side but at the end, thus flies like an arrow when cast. With its larger versions, 60-70 meter distance can be accurately cast with a medium heavy feeder rod, even in rising wind. Its smaller sizes can be accurately introduced to 20-40 meters even with a light feeder rod, under any weather conditions. Since the lead is at the bottom, thus the loosely loaded feeder can even empty its content mid-water, which is particularly useful on silty water areas, or for mid-water feeding fish.

- TM728 TOP DISTANCE Feeder, "L" 30g
- TM729 TOP DISTANCE Feeder, "L" 40g
- TM730 TOP DISTANCE Feeder, "S" 30g
- TM731 TOP DISTANCE Feeder, "S" 40g
- TM732 TOP DISTANCE Feeder, "XL" 60g

**CRAB River Feeder**

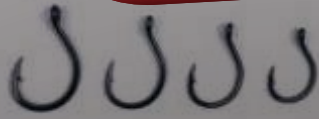

Special river feeder. The two spines at the feeder front need to be bent at about 45 degree angle and then used. The current tightens the line, the legs dig into the bottom and extremely well secure the feeder. Due to its shape, the current also pushes the feeder toward the bottom, aiding the legs' penetration. Despite the feeder's small size, sufficient bait can be introduced with it. Huge advantage is that where traditional four-legged feeders hold 200gr, from this the 125gr is sufficient. Therefore easier to handle, better spares the rod, thinner main line can be used, and during playing, we'll have fewer lost fish.

- TM706 CRAB river feeder 100g
- TM707 CRAB river feeder 125g
- TM708 CRAB river feeder 150g

**Method Feeder Circle Hooks**

Made in Japan, nearly circular hook type very popular among method feeder anglers. Large curve, offset point, short shank, excellent edge retention properties, chemically sharpened micro-barb and barbless black nickel surface eyed hook. Primarily recommended for hair-rigged, or threaded hookbaits, be it pellet, wafter, boilie, or even seeds.

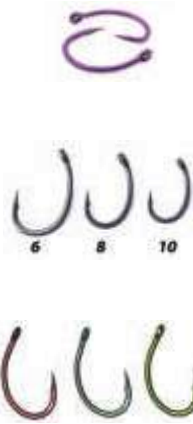

- TM974 Method Feeder Circle Hook Barbed #6
- TM975 Method Feeder Circle Hook Barbed #8
- TM976 Method Feeder Circle Hook Barbed #10
- TM977 Method Feeder Circle Hook Barbed #12
- TM828 Method Feeder Circle Hook Barbless #6
- TM829 Method Feeder Circle Hook Barbless #8
- TM830 Method Feeder Circle Hook Barbless #10
- TM831 Method Feeder Circle Hook Barbless #12

**METHOD FEEDER Hooks**

Made in Japan, hooks developed for method, specifically method feeder carp fishing. Large curve, sufficiently strong shank, slightly offset, excellent edge retention properties, chemically sharpened, teflon coated micro barb, eyed hook. Primarily recommended for hair-rigged, or threaded hookbaits, be it pellet, wafter, boilie, or even seeds. Currently comes in three sizes.

TM770 Hair Rig Silicone Rig 7mm  
 TM771 Hair Rig Silicone Rig 10mm  
 TM772 Hair Rig Silicone Rig 15mm

**Hair Rig Silicone Rig**

With this solution, the hair rig's, for many troublesome, tying problem can be avoided. Need to cut off the hair rig from the card together with the silicone rig. Then need to insert the hair rig into the bait, then with the hole at the rig's other end, need to hook onto the hook.

**Hair Rig**

Hair rig made for soft baits with hair rig use. Simply need to thread into the bait and we can start fishing! The two barbs on the rig's shaft well secure the bait, so even with soft pellets, the 100-meter cast isn't a problem. Doesn't shatter the pellet! Comes in three sizes, 7 - 10 and 15 mm length, thus hair rig length can be chosen according to bait size.

**Hair Rig Fine**

Made for those who like competitive method feeder fishing and for more cautious fish. Even maggots can be presented problem-free as threaded bait with this little "instrument." The nearly half diameter also halved the Fine hair rig's weight. For its use, 0.06 - 0.10 mm hooklink is most suitable.

TM878 Hair Rig Fine  $\varnothing 0.3 \times 7$  mm  
 TM879 Hair Rig Fine  $\varnothing 0.3 \times 10$  mm

TM877 Hair Rig  $\varnothing 0.6 \times 7$  mm  
 TM875 Hair Rig  $\varnothing 0.6 \times 10$  mm  
 TM876 Hair Rig  $\varnothing 0.6 \times 15$  mm

**Hair Rig Red**

The Hair Rig red-colored, thinner than traditional, 0.45mm thick and lighter version. Made for those who like finer method feeder fishing, as we can thread smaller wafers onto it problem-free.

TM768 Red hair rig  $\varnothing 0.45 \times 7$  mm  
 TM769 Red hair rig  $\varnothing 0.45 \times 10$  mm

**Method Feeder Rig**

Simply insert the hair rig into the bait to be presented, and we're done with baiting. This product also solves the hair rig equipment and rig making problem, as we just need to hook it under the feeder.

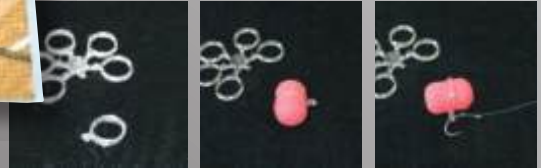

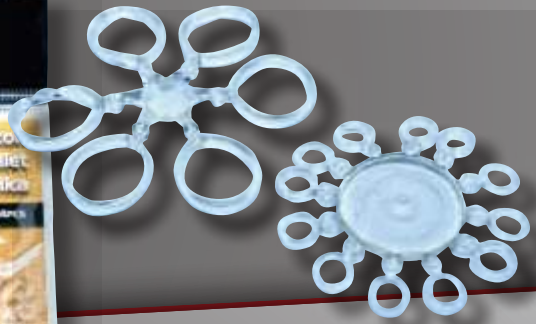

TM703 Top Mix Method Feeder Rig with 7mm hair #6  
 TM702 Top Mix Method Feeder Rig with 7mm hair #8  
 TM701 Top Mix Method Feeder Rig with 7mm hair #10  
 TM700 Top Mix Method Feeder Rig with 7mm hair #12

**Silicone Pellet Band**

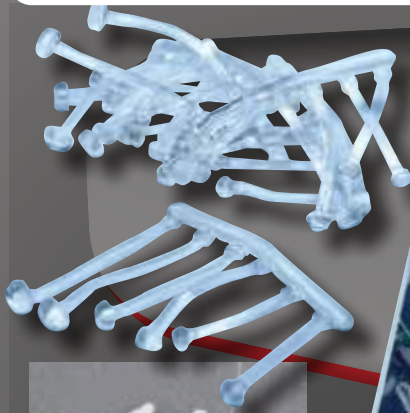

Special soft and flexible silicone band, its essence is that the bait shouldn't be threaded onto the hook, but into the band, then hook onto the small hole on the band's edge. Such invisible contact can thus be created between bait and hook, which the most cautious fish won't notice.

- TM773 Silicone pellet band "S"
- TM774 Silicone pellet band "M"
- TM775 Silicone pellet band "L"

**TM776 Silicone Hair Rig Set**

Silicone hair rig for simple making and hooking of threaded baits. A threading needle is also needed for bait threading. The package contains 3 lengths of hair rigs and 4-4 pieces of each size. For 1-2 corn kernels or 1 pellet and boilie baits use the short, while for strings and larger baits use the longer rigs.

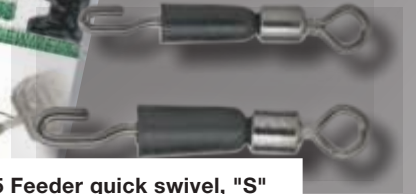

**FEEDER Quick Swivels**

Quick swivel for fine-tackle feeder anglers, providing quick rig change, with rubber bell protective cover. Simply hook the rig into the quick swivel's clip and pull the upper rubber bell onto the clip. Ideal choice for creating the finest feeder or picker end tackle. Available in two sizes "S" and "M".

- TM635 Feeder quick swivel, "S"
- TM636 Feeder quick swivel, "M"

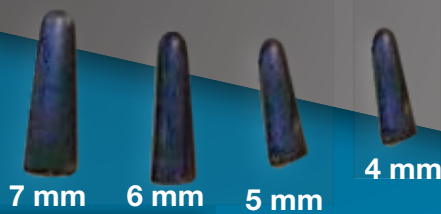

**Rubber Beads**

Barrel-shaped, noticeably tight, high-quality rubber bead, with which perfect float, sliding leger, or feeder end tackles can be made. With the factory-formed loops, we can easily thread them onto our monofilament or braided main line.

**FEEDER Stoppers**

Special rubber bell and bead made for long-legering feeder fishing, preventing tangling. We can cover the connection between main line and anti-tangle, or main line and power gum with it, thereby preventing the rig from tangling. At the same time, it will also be the feeder bead.

- TM637 Feeder stopper "S"
- TM644 Feeder stopper "M"
- TM645 Feeder stopper "L"
- TM646 Feeder stopper "XL"

- TM647 Rubber bead "S"
- TM648 Rubber bead "M"
- TM649 Rubber bead "L"

### Method Feeder Quick Swivel

The quick-swivel bead is already known by almost every method feeder angler. Based on our experience, we also made our own Method feeder quick swivel, moreover in several variations. One is the traditional, army green colored, which is a slightly stronger version of the known ones. This comes in "S" size. The other variation is made from fluorocarbon material, therefore much less visible in water, similar to lines made from similar material. Thinking of long-distance method anglers too, this was made in two sizes "S" and "L". The smaller for finer fishing, the larger, stronger variation for those fishing with large feeder, at great distance.

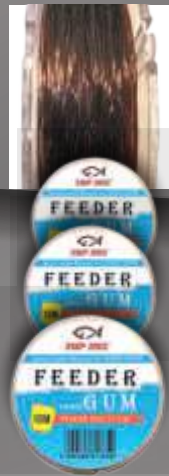

TM655 Method Feeder quick swivel "S", army green  
 TM656 Method Feeder quick swivel "SS"  
 TM657 Method Feeder quick swivel "S", fluoro clear  
 TM658 Method Feeder quick swivel "L", fluoro clear

### TOP Feeder Gum

Feeder Gum's elastic construction gum forms a flexible transition between main line and thinner hooklink. During rig operation, its role is to disperse, compensate extra load arising during casts, strikes, or playing, thereby preventing losing fish, or worse, main line or rig breaking. Its relative stiffness also prevents tangles from forming. Its stretch doesn't endanger strike effectiveness, but prevents rig breakage in case of suddenly occurring forces.

TM785 TOP Feeder Gum 0,6mm  
 TM786 TOP Feeder Gum 0,8mm  
 TM787 TOP Feeder Gum 1,0mm

### Fluoro clear Swivel Beads

Specially designed bead for internal guide feeders, where the main line connects to a fluorocarbon material covered swivel. The rig needs to be connected to the swivel's other end. Provides fixed, non-slip and twist-free connection.

TM777 Swivel bead fluoro clear "S"  
 TM778 Swivel bead fluoro clear "L"

### X8 MONSTER Hooklink Line

High-quality, 8-strand braided, perfectly round-braided top-category braided hooklink line family. High-performance, thanks to the 8 strands, the line is perfectly round cross-section along its entire length.

Code	Diameter	Breaking Strain	Packaging
TM740	0,08mm	5,5kg	10m
TM741	0,10mm	5,9kg	10m
TM742	0,12mm	8,2kg	10m
TM743	0,14mm	9,5kg	10m
TM744	0,16mm	10,5kg	10m
TM745	0,18mm	13,2kg	10m

Papp Zoltán

TM705 Digital Scale  
 Digital fishing scale, with which we can easily weigh caught fish.  
 Maximum load capacity: 50 kg  
 Accuracy: 5g

**TM907 Bait Mixing Bucket with Bait Tray 5L**  
**TM904 Bait Mixing Bucket with Bait Tray 10L**  
**TM902 Bait Mixing Bucket with Bait Tray, 18L**

5 and 10 liter flexible material-made, elegant black colored lidded bucket, with 2 and 3 liter white colored trays (wall height 6.5 cm). Besides the mixed bait stored in the bucket, baits intended for the hook can be stored on the tray, and all these can be protected from drying out with a well-closing lid.

**TM908 17 liter bucket**  
**TM915 Lid for bucket**  
**TM916 12 liter bucket**

17 and 12 liter, internationally accepted, calibrated (inside with liter divisions) bait mixing bucket.

**TM917 Plastic Tray**  
**TM827 Plastic Tray, sieve bottom**

Large bait tray, for storing bait and live bait. With the accompanying sieve, well usable for riddling maggots. Size: 20x30x10cm

**TM885 Maggot Limiting Bowl**

Maggot limiting bowl according to FIPS competition rules. The whole little box is perforated, so placed in a water bowl, the larvae survive until limiting happens.

**TM856 Bait box 0.5L**  
**TM857 Bait box 1.5L**  
**TM858 Pellet Soaker**

High-quality bait boxes with rubberized rim lid and pellet soaker insert.

**Bait Box, sieve bottom**

High-quality, inside volume scaled, bottom with sieve fabric bait boxes, with lid, for storing live baits.

**TM850 Bait box with lid, sieve bottom, 1/2 l**  
**TM851 Bait box with lid, sieve bottom, 1 l**

**Bait Box**

High-quality, inside volume scaled bait boxes, with lid, for storing live baits.

**TM848 Bait box, four compartments**  
**TM852 Bait box with lid, 1/2 l**  
**TM853 Bait box with lid, 1 l**

**TM862 Baitbox 13 x 6 x 5 cm**

Useful small baitbox, especially when during competition fishing, many types of bait need to be placed next to us on the tray, where space is limited anyway.

### Maggot Riddling Sieves

The 16x16 cm size sieve usable for bait boxes. The larger size usable for the 20 x 30 x 10 cm bowl.

**TM854** Maggot riddling sieve

**TM855** Maggot riddling sieve, rimmed

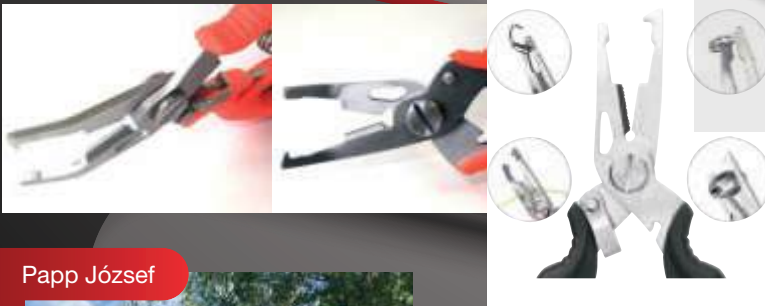

**TM918** Maggot riddling sieve 20 x 30cm

### TM784 Braided Line Cutting Scissors with Bent Pliers

This scissors, as its name implies, can be used not only as cutting tool but also as pliers, lead remover, and keyring opener. The bent pliers part is meant to serve easier access. Thanks to the stainless steel-made scissors' micro-serration, it cuts any braided and monofilament line perfectly, without fraying. Recommended for anglers who want to purchase an excellent quality, multi-function scissors.

Papp József

### Bait Sieve

Sieving sieves for sieving grounds, baits, improving consistency. With its use, the bait, ground becomes more homogeneous, better, faster breaking.

**TM887** Bait sieve, 2 mm, for bucket

**TM895** Bait sieve, 4 mm, for bucket

**TM896** Bait sieve, 6 mm, for bucket

**TM899** Bait sieve, 2mm, for tub

**TM897** Bait sieve, 4 mm, for tub

**TM898** Bait sieve, 6 mm, for tub

### Bait Limiting Bowl Set

At competitions, limited live bait quantities can be precisely measured with this bowl set's help. The set contains 5 stackable boxes, 1 l - 3/4 l - 1/2 l - 1/4 l, and a small 1/8 liter. The set was completed with two new, a 1.5 and a 2 liter bowls.

**TM838** Limiting Bowl Set Supplement Set

**TM841** Bait Limiting Bowl Set

### 783 Ceramic Braided Line Cutting Scissors

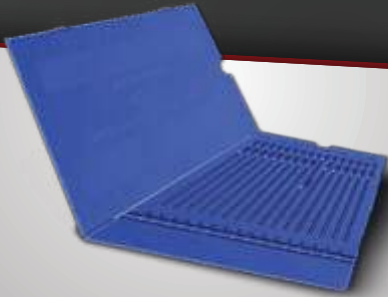

Offers anglers a tool, at least certainly more perfect than previous ones, for perfect and problem-free cutting of braided lines: scissors equipped with ceramic cutting blades. With this scissors, it doesn't occur that the edge goes dull (unless it breaks) and doesn't cut the braided line. Naturally, other lines can also be cut with the scissors. The ceramic cutting blades are clamped into a stainless steel spring housing, so rust danger cannot exist either. ATTENTION! The ceramic blades are brittle, thus can easily break, for example if dropped on stone

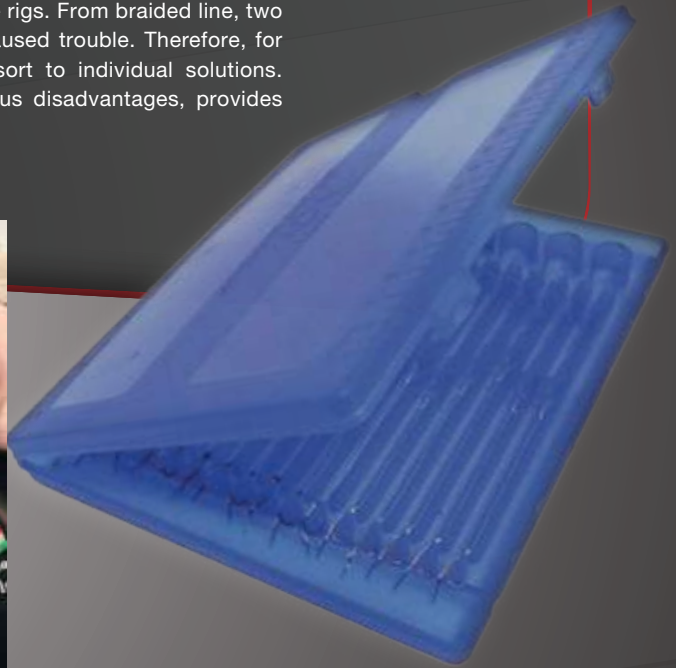

### TM810 Method Feeder Rig Holder

In method feeder fishing, we typically use short and braided line-made rigs. From braided line, two identical length rigs cannot be tied, therefore storing pre-tied rigs caused trouble. Therefore, for those who wanted to store many pre-tied rigs, always had to resort to individual solutions. However, this rig holder developed by TOP MIX, eliminating previous disadvantages, provides opportunity for storing many pre-tied rigs.

Papp-Kósa Gabriella

### HOOK BOX

COMPACT STORAGE SYSTEM FOR TOP MIX METHOD FEEDER RIGS

### TM704 Method Hook Box

Top Mix Method Hook box, primarily made for storing method feeder rigs. In the rig holder, 12 different rigs can be stored simultaneously, 10 hooks fit comfortably on one pin. The pin ends' design prevents rigs from slipping off. Designed for 10 - 12.5 and 15 cm rigs. Every rig holder contains a sticker set so the type of hooks and rigs stored in the holder can be labeled. Magnetic closure and rubber gasket complete the rig holder, so stored rigs arrive safely to the bank.

### TM860 Team Top Mix Distance Measurer

Offers complex solution for feeder anglers prioritizing accurate fishing. The package contains two bank sticks and the accompanying 5 meter cord. The bank sticks have threaded ends, so they can be screwed even into the hardest ground. Winding our line onto the foam part, we protect its surface. At the cord end, snap-on hooks are located, which can turn when winding the bank stick.

### TM881 Adjustable Neoprene Rod Protection Strap

Well usable, sensible, and great product, this adjustable length, soft neoprene-made rod protector, which simultaneously protects our folded fishing rod's lower and upper parts. After finishing fishing, we can quickly, safely, and simply pack our rods with this practical, adjustable rod protector cap. Due to its elastic length adjustment possibility, usable for every feeder, spinning, boilie rod, well protects both ends of the rod sections.

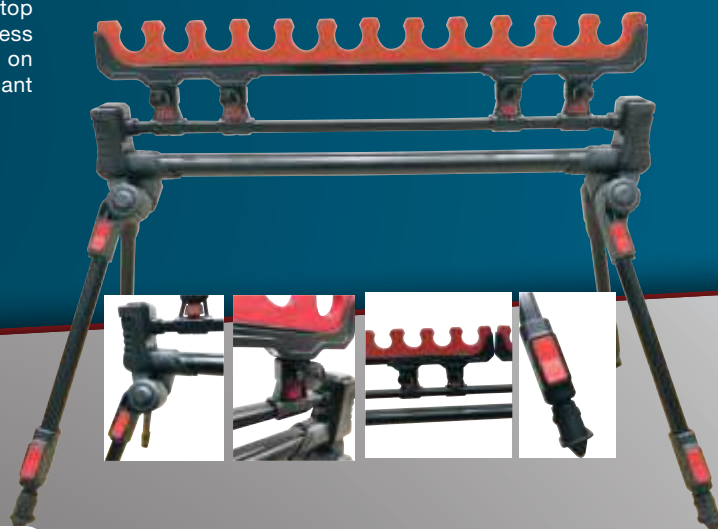

### Four-legged Competition Rod Rests

Top-quality four-legged rod rest for storing 12 rods, or top kits. Characterized by the very massive frame, stepless height adjustment from 30-60 cm height, legs foldable on button press, legs removable on button press, the elegant carry bag.

TM987 Four-legged rod / top kit rest, 12 rod

Kerekes Ernő

### Rubber-coated Landing Net Head with Grip Frame

Landing net head equipped with densely woven, fish-friendly rubber-coated net. Frame material is light, yet very massive aluminum profile. Due to the floating foam under the fabric, it doesn't sink, thereby much easier, faster to handle in water. One massive extra grip frame was fixed above the "Y" stem, into which we can boldly grab, guaranteed to bear the load. Due to the rubber coating, the net cannot absorb water, so after fishing, dries quickly.

TM882 Rubber-coated landing net head with grip frame, 40 x 50cm

TM883 Rubber-coated landing net head with grip frame, 45 x 55cm

TM931 Rubber-coated landing net head with grip frame, 50 x 60cm

TM954 TOP MIX Rubber-coated Floating Landing Net Head 50\*40cm

Extra light, yet strong and stiff frame-equipped carp landing net head. The landing net received fish-friendly rubber coating, which also further increases its durability, as fish dorsal spines get caught less. The seam under the frame hides a floating foam layer, thus the landing net head is easier to guide in water, enables faster landing.

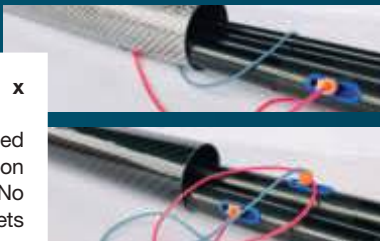

TM992 Team Top Mix Carp Competition Keep Net 4m

Densely woven competition keep net specifically designed for carp fishing sessions. Due to its material, carp dorsal spines don't get caught, in water we can easily roll forward caught fish in it. Massive strong aluminum frames hold it, the lower part also received extra reinforcement, therefore easily sinks in water.

**TM821 Carbon Top Kit Holder Tube, Ø 45 x 1800mm**

Unique, elegant design, for safe storage of threaded rods' top kits, high-strength, multi-layer carbon material-made tube with end plugs at both ends. No need to fear that it dents, or warps and the top kit gets damaged from sun heat.

**TM820 Carbon Feeder Tip Holder**

Unique, elegant design, for safe storage of feeder rods' tips, high-strength, multi-layer carbon material-made tube with threaded end plug at one end.

**TM822 Carbon Threaded Rod Holder Tube, Ø 60 x 1800mm**

Unique, elegant design, for safe storage of valuable threaded rods, high-strength, multi-layer carbon material-made tube with end plugs at both ends. If using this for storing, transporting threaded rods, then no need to fear that the threaded rod gets damaged.

**Line Marker**

For marking casting distance on fishing line. With its use, we can always fish precisely on the feed. Available: White, yellow, red, and fluoro colors.

- TM859 Line Marker white
- TM8592 Line Marker red
- TM8593 Line Marker yellow
- TM8594 Line Marker fluoro pink
- TM8595 Line Marker fluoro yellow
- TM8596 Line Marker black

Varga János - Hoffmann Ferenc

**864 Bait Mixing Drill Attachment**

By fitting into a drill, we can mix our bait in moments. Can save a lot of time with its use, not to mention the much better quality, more homogeneous mix. With TOP MIX corrosion-resistant steel-made mixing attachment, this operation takes only a few minutes, and the end result is a flawless condition mix, which doesn't even need sieving. Due to its proper design, the bucket's entire content can be quickly mixed with it.

**TM826 Method Wagglers 20g  
TM837 Method Wagglers 25g**

For mid-water fishing made, precisely worked out, cage waggler float. Into the feeder under the float, need to load the usual way mixed method bait, or hook paste. The bait, primarily pellet, needs to be presented mid-water. The fine-grained bait dissolving from the feeder lures fish under the float, and due to the continuously falling particles effect, they even come up to mid-water and greedily take the mid-water presented bait.

**Rod-attachable Tackle Ladder Rests**

Practical tackle ladder rest for spod rod or top kit. Due to the ladder's design, no separate fastener is needed, simply snaps onto the top kit, or the spod rod's appropriately thick part. Available in different sizes:

- TM960-27 for 10-13 mm diameter
- TM960-36 for 11-14 mm diameter
- TM960-45 for 12-16mm diameter
- TM960-54 for 15-20mm diameter
- TM960-63 for 19-25mm diameter

### STRADIVARI 3 Compartment Rigid Rod Bag

For the most demanding, black carbon patterned, waterproof material and matching gold color straps combination-made elegant, beautifully worked out 3 compartment rigid rod bags, with strong zipper, gold color TOP MIX logo. Provenly fits three distance casting reel-equipped feeder rods too. Perfect protection for equipped rods! Made in two lengths and three compartment version.

TM932 TopCam rigid rod bag 140cm  
TM933 TopCam rigid rod bag 160cm

### TopCam 3 Compartment Rigid Rod Bag

For the most demanding, authentic autumn bank vegetation effect, waterproof material and matching straps combination-made elegant, beautifully worked out 3 compartment rigid rod bags, with strong zipper, colored TOP MIX logo. Perfect protection for equipped rods! Made in two lengths and three compartment version.

TM958 TopCam rigid rod bag 140cm  
TM959 TopCam rigid rod bag 160cm

### TM924 TOP MIX WetNet Water Dipper

During countless fishing sessions, we encounter the problem when due to a high, collapsed bank, or unstable paving, we have difficulty drawing water for mixing bait. For such situations, an ideal tool is a 3m cord and strong loop-equipped EVA material water dipper. Due to the zippered net on the WetNet water dipper's top, additionally usable as small fish keep net for predator fishing sessions. Size: 20\*20\*20 cm

### TM926 TOP MIX WetNet Keep Net Bag

Due to its dimensions and undivided internal design, two competition keep nets fit comfortably side by side in it. Its EVA material prevents unpleasant odors and moisture seepage into our car even if storing the wet keep net in it. Size: 50\*60\*20 cm

### Team TOP MIX Bifocal Sunglasses

Bifocal prescription sunglasses ideal choice if besides eye protection, precise vision is also important to you. The prescription part found on the lenses' lower part enables focusing on near, so you don't need to switch between sunglasses and reading glasses. Comfortable, practical, and maximum protection while fishing! Our bifocal lenses are available in 3 diopters: +1.5/ +2.0/ +2.5 Soft TPR nose piece for universal fit, soft rubber for non-slip fit.

- UV400 protection
- The glasses' accessory is a hard protective case.

TM823-1.5 Top Mix Bifocal Sunglasses 1.5  
TM823-2 Top Mix Bifocal Sunglasses 2.0  
TM823-2.5 Top Mix Bifocal Sunglasses 2.5

 TM800 Team TOP MIX hooded sweatshirt, zippered, deep blue

**TOP Mix Cap**  
 TM789 Fullcap cap, white  
 TM801 Long visor fishing cap, sand gray

**TM814 TOP MIX**  
 Sunglasses, floating

**TOP MIX Polarized Sunglasses**  
 Polarized sunglasses ideal attire for fishing, for filtering water reflection and reducing harmful effects of sun rays. Thanks to the excellent quality polarization coating, the angler's eyes don't get tired. Gray lenses are recommended for undisturbed sunshine, while brown lens glasses are suitable for every light condition. The sunglasses' design allows ventilation, thus reducing fogging. Other advantages of polarized sunglasses include easy cleanability and maintainability, and models TM814 and 815 don't sink in water. The glasses' accessory is a hard protective case.
