

TOP MIX

2023

Papp József

Papp Zoltán

Papp Tibor

Over 45 years of fishing, decades of national selection and decades of making the products that go with it, we have learned that only with great care and the practical knowledge gained from our experience can we create products that make fishing work.

OUR TEST ANGLERS AND REPRESENTATIVES WORK EVERY DAY TO IMPROVE OUR EXISTING PRODUCTS AND CREATE NEW AND INNOVATIVE ACCESSORIES. We don't have a magic wand.

We believe in work, not miracles, so products are released after lengthy testing. We build from failure and celebrate every success.

We take small but determined steps along the way. These products are of course tested under both everyday and competitive conditions.

In 2023, we will continue to focus on developing the method feeder section, which is the strength of our company and our anglers. We are proud of our achievements in the past year, among countless smaller successes we have won silver medals at the Method Feeder Club National Championship and several of our anglers have been part of the national teams, Method Feeder the Masters the Disabled and the Masters Feeder National Team.

Varga János

Hoffmann Ferenc

Kerekes Ernő

And the owner of the company, József Papp, won a world championship as a member of the Masters national team. Whether as an angler or as a helper, we will do our best to be part of the national teams at the next world championships!

We will use this experience to make your fishing even more successful and productive.

THE REAL SUCCESS FOR US IS IF YOU SPEND YOUR FISHING TIME ON THE WATER USING TOP MIX PRODUCTS AND ENJOY YOUR TIME ON THE WATER.

Csike István

Petrovics János

Petrovics Richárd

Your pleasure and satisfaction is the most important thing for you!

No matter how big the fish, we are as happy as if we had caught it. When we have helped a little, it is confirmation that we are still on the right track.

This year again, vote your confidence in our tried and tested products and in our new products that will be launched in 2023.

Method Klub OB 2022, silver medal team

Best regards from our fishing friends:

József Papp, Tibor Papp, Zoltán Papp owners.

TM043 Carp Specimen Method mix

Specially developed for carp anglers, this coarse-grained, high-protein, high-carbohydrate groundbait is made from a mixture of crushed pellets, flavoured with squid-octopus flavouring and contains whole pellets. The mixture, which also contains crunchy Red Halibut, Premium Carp and corncob pellets, has been made even more desirable to the fish's mouth by adding various amino acids (L-serine, L-glycine, L-alanine, L-lysine). These carbohydrate additives cover the energy needs of the carp. Omega 3 fatty acid content promotes fast digestion.

PRO SERIES

CRUSHED Method Mix

TM044 Green GLM Method mix

A medium coarse-grained feeder groundbait with a high protein content of crunched pellets, LT fishmeal, green mussel extract, spirulina and crunched mussel shells. Due to the nature of the raw materials used, it has a strong, intense fish and shellfish smell.

After mixing, the shiny shell pieces are an eye-catcher, enhanced by their crunchy sound under water. A true four-season carp delicacy, which is a welcome treat for water dwellers in all seasons.

TM054 Hell of Fire method mix

Red colour, fish-based, highly potent spicy groundbait, specially developed for the method feeder fishing. It is a completely homogeneous, very fine, 0.8 mm grain diameter, very decomposing mix, what made of a mixture of several pellets. Especially effective on high pressure lakes. Do not touch the eyes or mouth during use!

TM049 Bloodworm Method Mix

A fine grind of a mixture of bloodworm extract and several types of fishmeal based pellets. Bloodworm is in red colour with a strong bloodworm taste and smell. Rapidly dissolving, it takes a short time to take effect. Due to its fine grain, fish do not feed well on it and it remains on the spot for a long time. Recommended mainly for the method fishing, but also suitable for standard feeder. It is an all-season groundbait, as the bloodworm are consumed by the fish regardless of the season.

TM051 Chocolate-Orange

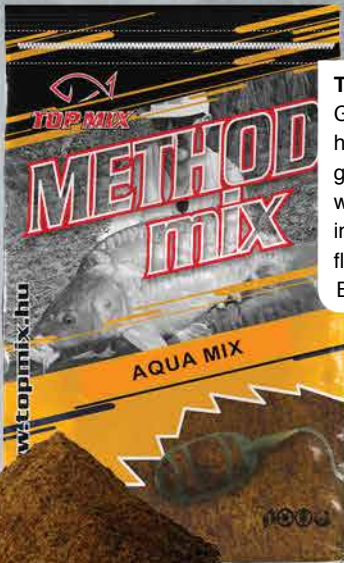

Top quality groundbait, what made from mix of crushed COPPENS pellets with over 40% protein. Intensive chocolate-orange flavoring and a medium-fine grain. For enhanced lure effect, we enriched with fluo orange pellets. All season groundbait.

TM045 Krill Method Mix

The KRILL Method mix, made with a special pellet cracking process, is a light-textured, high-protein content, fishmeal based, this method mix ideal for all times of the year. It's made exclusively from mixture of highly digestible crushed pellets with the addition of krill flour, which immediately encourages the fishes to ingest food without getting full.

Method Mix

TM183 AQUA MIX

Grind of the suitable blend of popular Aqua fish feed. We have created a mixture that, in our experience, has an even greater effect on fishes. Installed fishes from pond farms are well acquainted with these pellets as they feed the fishes in more and more fish farms. It is natural therefore can be flavored on demand. Recommended for Carps, Crussians, Breams and Sturgeons.

TM169 Spicy-Meaty Method Mix

Evenly fine-grained, raw meat-colored groundbait with micropellets. A blend of several types of pellets, fish meal, spice and meat extract. The Spicy - Meaty Feeder groundbait is perfect in all respects for bigfishes, carps, breams, tenches and barbels. It can be used in several ways depending on the fishing situation. After moistening, mix well and leave to repose for 15-20 minutes, then it is advisable to break through a riddle.

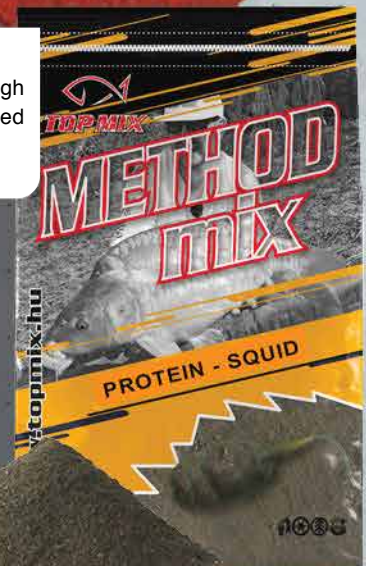

NEW!

TM038 50:50 Green Method Mix

A special 50-50 mixture of high-quality fishy pellets and sweet sponge cakes. Due to their composition, they elicit a rapid nutritional response from the fishes and keep them on the spot for a long time. Regardless of the season, they can also be used well in intensive lakes and natural waters, where the target fish is mainly carp and crucian carp.

TM170 PROTEIN SQUID Method Mix

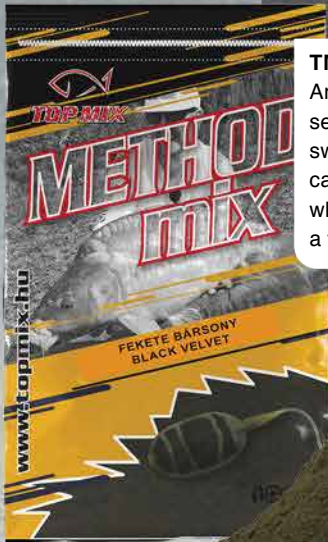

A dark colored, made from a mixture of high protein pellets, including squid flour, recommended primarily for warmer waters for method fishing.

TM172 Garlic -Fried Liver Method Mix

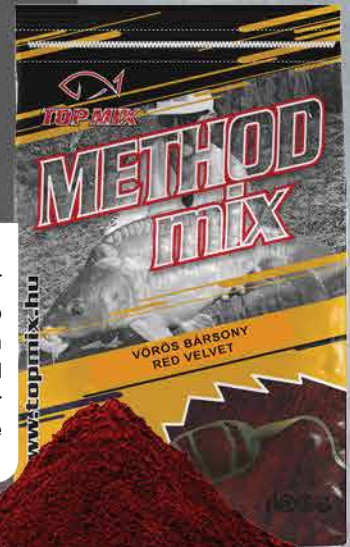

This is a high-protein groundbait, made from mixture of high attractive flavors, and grind of several carp pellets. Especially recommended for warm intensive carp waters.

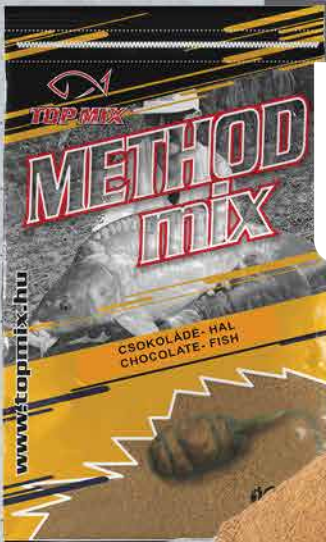

TM040 Black Velvet Method Mix

An evenly finely black colored groundbait, NOT fishmeal-based with unique flavor blended. It also contains finely ground sweet fluo crumbs, which makes it even more attractive. It can be used for all season. After mixing, let it stand for a while, then stir again and, if you like, you can break it through a fine riddle.

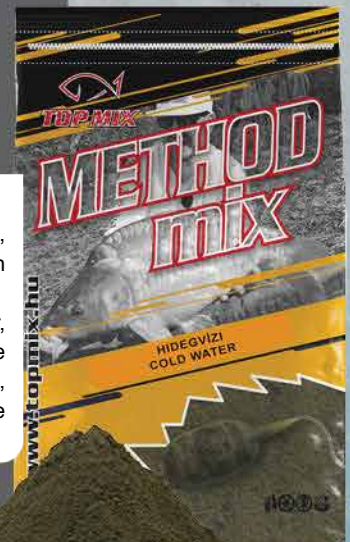

TM175 Red Velvet Method Mix

An evenly finely red colored groundbait, NOT fishmeal-based with unique flavor blended. It also contains finely ground sweet fluo crumbs, which makes it even more attractive. It can be used for all season. After mixing, let it stand for a while, then stir again and, if you like, you can break it through a fine riddle.

TM171 Chocolate-Fish Method Mix

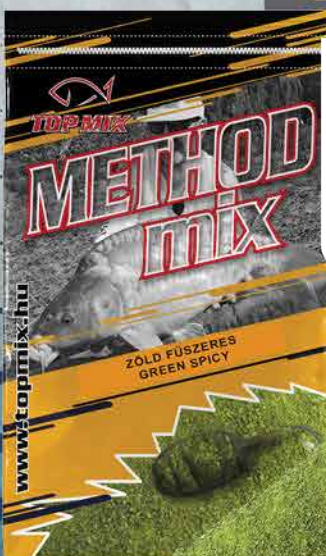

This groundbait made from a mixture of crushed carp pellets with chocolate and fish flavor. The weird pairing creates a perfect harmony. Perfect for all conditions. It is also suitable for cold late autumn or early spring waters, but also in very effective in warm periods. It can be used effectively for carps, crucians, and breams.

TM041 Cold Water Method Mix

High protein content, finely ground, black colored, fishmeal-based method feeder groundbait with cranberry - coriander flavor.

Black is required for clear, transparent waters in winter, regardless of the color of the bottom. Ideal for late autumn, early spring waters. After mixing, left to stand, then mix it again and break it through a fine hole riddle if we like.

TM173 Green Spicy Method Mix

Green Spicy Method Mix is made from a mixture of several carp pellet. Special and very effective flavors mix take it suitable for carp, bream and crucian fishing from early spring to late autumn. Its unparalleled special spicy nature attracts the fishes to our hook as a magnet, even when no other bait is smelled.

TM166 Strawberry-Fish Method Mix

All season groundbait, what made from a mixture of carp pellets with strawberry and fish flavors. Strawberries are perhaps one of the most effective flavor in carp fishing. And the high-protein pellet grist, largely satisfies the energy needs of carps. It is also suitable for cold late autumn or early spring waters, but also in very effective warm periods.

WINNER

The WINNER product range is a high-end of TOP MIX groundbaits in which find competitive fishing, which also includes carp, bream, and river groundbaits as well.

Each is characterized by a high quality added ingredients. It's been developed based on many years of competition experience to effectively for peaceful fishes.

TM253 WINNER Carp - Crusian, Red

Bright red, medium-grain groundbait with pasty, sweet, pastoncino-lemon flavor, which is strongly contrasting from the bottom. When mixed with water, we are getting a well-adhering, homogeneous groundbait, in which each grain can be easily contrasting, even so can be easily, dumpling with one squeeze, easy to handle, with a high load capacity and a minimal amount of return particles. It has good adhesion and can take a lot of livebait and partickles. Easy to squeeze, but at the same time it decomposes nicely and quickly on the bottom. Its adhesion and disintegration indicators are also excellent. It is also recommended for float, feeder and match fishing when the target fish is crucians and carps.

TM263 WINNER Color Carp

The additives of groundbait are sweet, and some are even toasted. It also contains LT fishmeal and fish pellets as well. The yellow grains are the Haith's Red Factor™ @ additive. Their property is that they swell significantly and behaves like a soft pellet. The characteristic of the ready groundbait is that almost doubles its volume, its grains separate nicely, and a properly squeezed feeding ball breaks down quickly. The wetted grains remain on the bottom.

TM259 WINNER Barbel

Medium coarse-grained, brown river groundbait, with high crysalis (silkworm puppet), white and parmesan cheese content. The barbels, nosecarps and orfes are like the acrid silkworm puppet, We can deceive these fish onto our feeding and hookbait with this flavor from a larger distance. It also contains an outstanding amount of toasted, oily seeds. Its adhesion is excellent, easy to make heavy with gravel, it easily delivers boiled or even live maggots.

TM262 WINNER Carp-Crucian Black

Fruity-sweet flavoured competition groundbait recommended primarily for cold water. Properly mixed with water, obtaining a well-adhering, homogeneous mix with a minimal amount of rebound grains. It has good adhesion and can delivers lot of live bait and particles. Also an excellent long hooklink feeder fishing.

TM058 WINNER Like

High quality groundbait, recommended for bream and matchfishing. The grain size is small, texture can be adjusted on a very wide scale, even with addition of minimal water compared to the average groundbait. It contains a large amount, of gristed oilseeds and a higher, than average amount of good quality gristed gingerbread. It can be mixed with any other feed.

TM256 WINNER Carp-Crucian

Strongly yellow colored, pleasant, pastoncino-sweet, large-grained competition groundbait. Properly wetted, obtain a well-adhering, homogeneous bait. It has good adhesion and can carry a lot of living and particles. Recommended from spring to autumn, when the target fish are crucian carps and carps.

TM258 WINNER Bream

Medium brown, finely grounded, competition groundbait made with cocobelge-lemon-coriander aroma and crisp colored sugar grate. It does not clumping when wetted, so it can be easily mixing. Rapidly break down in the water. Even water entering and during movement in the water column, particles dissolve from it, enhancing immediate lure effect.

Method Carp

TM125 Method Carp Strawberry Cream
Strawberry is a truly classic flavor, what we combined with sweet caramel, making this flavor even more intense and effective. The groundbait, which is self-evident, contains carbohydrates, betaine, and protein, and high visible grain which more effectively for fishes. Residents of our natural waters also like to visit our feederbasket, if we fill it with this bait, but we can achieve great success with it on intensively planted lakes. This feed can be used in all seasons.

Method Carp groundbaits

The method feeder solution is very effective as well as spectacular. The method feeder technique, which was a novelty in our country a few years ago, is becoming increasingly popular with anglers at home and abroad, and is a success for beginners and advanced anglers alike. Our company has been aiming to provide a full range of method techniques for years. The result of these developments is the creation of a new range of groundbait based on a new foundation.

The Method Carp groundbaits are characterised by the fact that the fine particles have been replaced by larger ones and no raw ingredients are used in their production. They are rich in colourful particles that also arouse the curiosity of the fish. The ingredients from the new production technology and the larger particle size result in a very fast breakdown and help to catch the really big fish. With proper wetting, the adhesion and breakdown of the feeders is also perfect. The well-balanced content (carbohydrate, protein, betaine) can be an attractive food for carp and carp-like fish in all seasons.

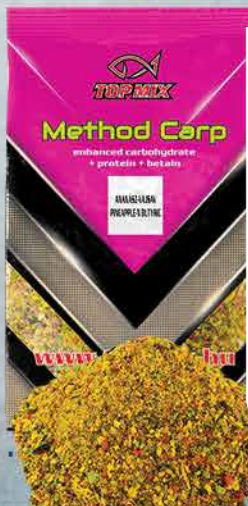

TM126 Method Carp Chocolate-Orange
The chocolate-orange flavor has become a success product in recent years, so this can't miss from this product family neither. The sweet chocolate-orange taste penetrates into the groundbait, allowing the fish to find it fairly quickly, and thanks to the calling for attention color is more attractive. This groundbait contains carbohydrates, betaine and proteins, which more effective for fishes. With this groundbait we can fish successfully for crucian carp in addition to carp. Due to the color, it is recommended more warming water in summer season.

TM127 Method Carp Honey Tiger Nuts

Honey and tiger nuts are also the favorites of carp anglers, but in our experience, their mixed taste is outstanding. It proved to be a real treat for big fishes. The high visible colors added flavors, and grain size, the content value enhances the attractiveness, thanks to the carbohydrate, protein and betaine content. A real big fish treat, both on wild water and high pressure lakes!

TM128 Method Carp Pineapple-Butyric Acid
Sweet pineapple and butyric acid like fire and water. This sweet acidic interaction is so enticing to fish that it has become a favorite of almost every angler during the summer months. Add striking granules, combine them with carbohydrate, protein and betaine, and then close the whole thing, until someone breaks it up on the bank. In addition to carp, we can also fish for grass carp very successfully in summer.

TM129 Method Carp Headshot (Blue Cheese- Mussel)

With the blue cheese-mussel mixture, was born a new taste, which was really made for lovers of the Danube and our rivers. Target fish are, of course, the Barbels, Nose Carps and Carps. But based on our experience, it can be successfully applied to any of our whitewater lakes for carps. This intense cheese taste mixed with mussels lures the fish from far to our spot, where a set table and lots of colorful crumbs await them. The high content of carbohydrates, protein and betaine keeps the fishes on feed for a long time. Once unpacked, sniffing into the bag will make it easy to decipher where got the nickname „Headshot“!

TM130 Method Carp Sweet Corn

Sweet corn is almost in the genes of carp, which is why they almost always like to have this flavour. So this range is not lacking in this taste and flavour. The sweetcorn flavour permeates the bait, allowing the fish to find the bait quickly, enhanced by the eye-catching bright yellow colour of the product. The groundbait contains carbohydrates, betaine and protein, which further enhances its attractiveness. This bait is also an effective way to fish for carp as well as crucian carp. Because of its colour, it is preferable for use in warming or summer periods.

FEEDER Pro

TM037 Feeder Pro Mango

A medium fine-grained feeder groundbait with a conspicuous orange colour and essential mango flavour. The cloud that forms when it breaks down on arrival at the water is an eye-catcher, but later arriving fish can also take a bite from the caruba and crunchy pellets in the mix. Its constituent elements and particle size make it highly recommended for carp and crucian carp fishing. Primarily effective in warming or summer conditions, but has also surprised in winter months.

TM036 Lake Balaton

It is a special groundbait for anglers on Lake Balaton, but it is an ideal choice for any natural water area in Hungary. Its compilation is based on successful lake and wildwater fishing for several years. It typically requires more water to mix than an average feed, and it is important to wet it afterwards, it dries easily. It also contains fine clouding and coarser grains that sit well on the bottom. It is light-colored, it makes strong cloud around the basket or dumpling when broken down. It can be used effectively in any period from spring to autumn.

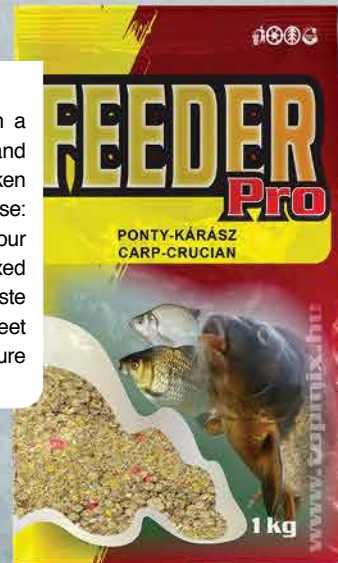

Fodor Csaba

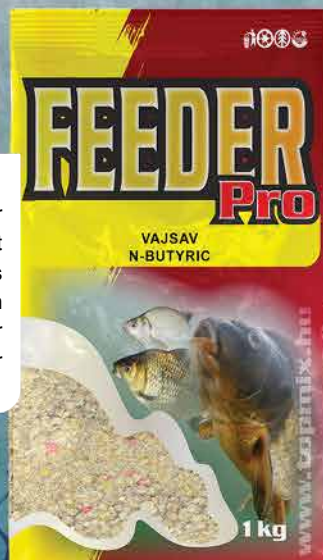

TM070 Carp-Crucian Carp

A fruity ground bait for feeder fishing with a special big carp flavor. The grain size and richness of the groundbait, the whole or broken grain oil seeds all serve the same purpose: to keep the carps and crucian carps on our feed as long as possible! The Color in mixed circumstance is light brown, beige. The taste is sweet due to the high content of sweet ingredients. Recommended water temperature above 15 degrees.

TM068 Butyric acid / N-Butric

The use of butyric acid groundbait is essential for anglers from spring to autumn. The groundbait is made from natural ingredients and contains no fish ingredients. It is white in colour, which also forms a strong mist around the feeder or dumpling when broken down. Recommended for Grasscarp, Carp, a Crucian during warm periods.

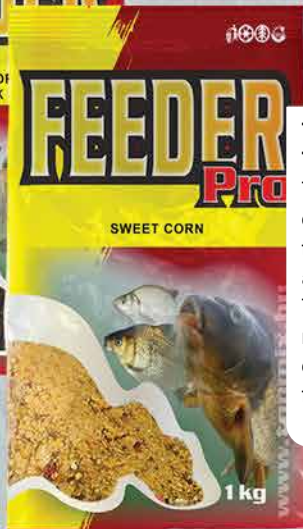

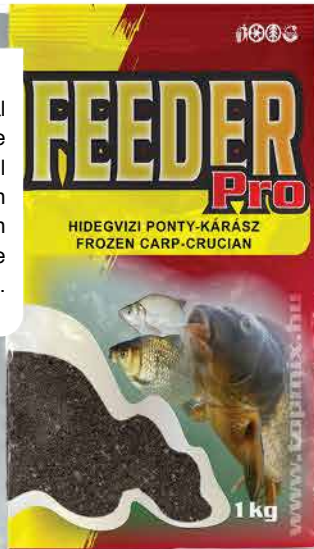

Sárvári Lajos

TM071 Coldwater Carp- Crucian carp

A fruity groundbait for feeder fishing with a special big carp flavor. The grain size and richness of the groundbait, the whole or broken grain oil seeds all serve the same purpose: to keep the carps and crucian carps on our feed as long as possible! The Color in mixed circumstance is dark grey and black. The taste is sweet due to the high content of sweet ingredients. Recommended water temperature above 15 degrees.

**TM104 Sweet Corn
TM105 Sweet Corn Black**

These members of the Feeder PRO range contain 30% extruded soybeans, so in addition to their high carbohydrate content, they also have a high vegetable protein content. They are used when the target fish is primarily larger carp. The light yellowish colored, coarse-grained is primarily recommended for warmer waters, while the fine-grained black is recommended for colder waters.

**TM069 Super Sweet Carp FINE
TM072 Super Sweet Carp**

Mixtures of large-grained yellow and tiny-grained black feeder groundbait for carps and crucian carps with the same aroma as the Italian Panettone skateboard. They taste very sweet due to their high content of super-sweet ingredients. The yellow version is primarily warmer in the summer, while the black FINE version is the feed for cold waters. By mixing the two, we can also adjust the grain size and color we think are best for the given situation. Recommended water temperature: above 15 degrees, while the FINE version is in colder water on dark bottom.

TM073 Spice Bream

A sweet-spiced competition groundbait with 100% natural ingredients and no synthetic flavor, mainly for feeder fishing for bream and white bream. Roasted, grounded seeds, gingerbread, the best quality bread crumbs and the added spices to them, make them unique, giving them an unparalleled, interesting very delicate, sweet-spicy taste. It also contains small amounts of ascending grains, as bream often feeds in the higher water level. When mixed in, it is brown color, so even the cautious fishes will approach carefully. It can be used effectively at any time of the year.

CARP NUGGETS

Carp Nuggets groundbaits

The main feature of the Carp Nuggets range is the very coarse grain size. In addition to granular grain derivatives, contain halibut pellets and a sufficient amount of adhesive as well. It is mainly recommended for feeding basket fishing, but of course it can also be used as a basic bait for float fishing when our target fish are carps. The ingredients, flavors, colors, extra large grain size of the groundbait all selected with the goals of the most productive fishing in the shortest time possible. Accordingly, contains rapidly dissolving grains that provide a fast lure effect. It also contains black halibut pellets, which in itself is excellent carp bait and significant amounts of large-grained fluo red, fluo orange and fluo yellow, flavored with a mixture of sweet, carp flavors. Thanks to the fluo colors, it increases the curiosity of fishes, even in more turbid water.

It can be used as a basic feeder, for habituation feeding, in feeder basket, and can be mixed with fine-grained feeders with very good results if our real target fish are large carps. It is also excellent for making stick mixes or filled in PVA mesh and tied directly to the hookbait. It's available in six flavors.

- TM020 Carp Nuggets Lychee
- TM024 Carp Nuggets Pineapple
- TM025 Carp Nuggets Butyric Acid
- TM026 Carp Nuggets Spicy Liver

Végh Róbert

TM029 300 Basic groundbait

A high sweet biscuit content chocolate-vanilla flavoured groundbait for hobby anglers. It contains ingredients that promote successful fish catching. Primarily for carp and crucian carp fishing, but experience has shown that bream also like it. We also recommend it for base feeding, and feeder fishing. The groundbait has good adhesion and a medium dissolution time. Its economical 500g packing makes it recommended for use in day ticket waters where you have to wait up to half an hour for one fish, or during a holiday when you and the kids go down to the bank for a few hours.

ECONOMIC

READY-MIXED FEED MATERIAL

COMPLETE MIX ✓

ECONOMIC COMPLETE feeders

A well thought out and improved version of the deservedly popular Economic groundbait range. These feeders don't even need to be moistened anymore because we've already done that! All you have to do is load the contents of the unpacked bag into the feeder and you can already go fishing! Fast, clean and effective. Perhaps these three words can be used to describe these basic points of carp fishing groundbaits.

- TM066 Economic Complete Grass Carp
- TM067 Economic Complete Black Halibut
- TM075 Economic Complete Strawberry-Raspberry
- TM076 Economic Complete Honey
- TM077 Economic Complete Vanilla
- TM078 Economic Complete Carp-Crucian Carp
- TM079 Economic Complete Winter Carp

- TM164 Economic Carp-Crucian Carp F2
- TM165 Economic Skimmer

CARP LINE

GAZDASÁGOS
2,5 kg
GAZDASÁGOS

TM082 Vanilla

One of the most popular groundbait. It is especially proven in carp fishing. The penetrating scent and sweet taste of natural vanilla lures our favorite fish close to our hook from afar. It sticks great, an excellent groundbait for feeder and a traditional feeding basket fishing as well.

TM090 SILVER Carp

This groundbait developed specifically for Silver Carp. The finely ground grains makes a large cloud during dissolution, which is attractive to the silver carps. Ascending, long-floating grains further enhance alluring effect. It can be used as a dumpling or kneaded into a feeding basket, choose a floating one for the hookbait.

TM086 Grass Carp

Highly effective bait based on green alfalfa - corn germ, enhanced with green alfalfa extract, developed for grass carp fishing

TM080 Strawberry-Raspberry

The most popular fruit-flavored groundbait. Separately both flavors have proven themselves in carp fishing, but together they multiply effectiveness. The penetrating flavor of natural strawberries and raspberries and the pleasant taste of fruit lure our favorite fishes close to our hooks from afar. The red groundbait stick very well, it can be used perfectly in both feeder and traditional feeder baskets solutions.

TM087 Nosecarp- Barbel

Ingredients of groundbait has been selected according to the needs of river fishes. All components of the mixture are heavy and sink well. It adheres well, so it dissolves more slowly, but it can absorb a lot of livebait. It's conatin carefully roasted, oily seeds, salty ingredients and parmesan cheese.

Rigó Edit

TM083 Honey

A delicacy of sweet-mouthed fish. A favorite of large carp and grass carp. It is made with pure acacia honey flavor, especially effective in cold water fishing. It sticks great with an excellent mix feeder and a traditional feeding basket as well.

TM089 Black Carp

Black-honey-flavored black colored groundbait, recommended primarily for cooling or cold water temperatures. The mixture of special flavors attracts the fishes to the hookbait from afar. It sticks well, making it an excellent blend for both feeder and traditional feeding baskets.

TM084 Tiger nuts

Tigernuts are a real carp delicacy. Plus, the tigernuts are sweetened with a littlebit more sourcream. It also stimulates the stomachless, choosy fish to bite. The timime carps do not leave cold the fresh smell and creamy pleasant taste of the seductive oilseed. It sticks great with an excellent mix feeder and a traditional feeder as well.

TM081 Jubilee Carp

Very affordable carp groundbait. In 2015, the Top Mix celebrated the 15th anniversary of the formation of company. Out of respect to our customers, we would be kind with this good quality, but special tasted carp groundbait.

TM085 Sweet Biscuits

Delicacy of sweet-mouthed fishes. A favorite of large carps and grass carps. It is made with a biscuit flavor, especially effective at warmer water temperatures. It is the number one carp bait the saline waters of the lowland. It sticks well, an excellent mix for feeder and a traditional feeder as well.

DYNAMIC CARP

DYNAMIC CARP

A pellet range, what combined with a complex mixture of four types of AQUA and colored sweet pellets, compiled based on experience of the Method feeder technique. It is fishy, therefore protein-rich and thanks to attractive colored, carbohydrate ingredients, elicits a rapid nutritional response from the fishes and keep them on the feeding for a long time. DYNAMIC CARP pellet is an attractive and balanced carp food, with added colorful micro pellets enhance the effect of the mixture, so not only the taste but also the sight arouses the curiosity of the fish. The soaked pellet in water, pressed into a method feeder or wire feeder, provides excellent and versatile use. Suggested Use: Put as much of the pellet into a bait bowl as you want to use and pour enough water (and flavor) over it to cover it, let it soak for a minute, then pour off the water and stir a bit. Then wait ten minutes and the pellets will be in perfect condition in the feeder. Regardless of the season, they can also be used well in intensive lakes and natural waters, where the target fish is mainly carp and crucian carp.

- TM275 Dynamic Carp pellet Strawberry
- TM276 Dynamic Carp pellets Pineapple
- TM277 Dynamic Carp pellets Chocolate-Orange
- TM278 Dynamic Carp pellet Squid
- TM279 Dynamic Carp pellet Butyric Acid
- TM282 Dynamic Carp pellets Lake Balaton
- TM283 Dynamic Carp pellets Liver
- TM296 Dynamic Carp pellets Honey-Tigernut
- TM297 Dynamic Carp pellets Cold water

DYNAMIC BOX

Dynamic pellet box

The Dynamic Box contains a special mixture of fishy pellets, so rich in protein and carbohydrates, with the amount of 100ml of flavor needed to prepare the 400g pellet mixture for fishing. Unpacking the flavor sachet, pour the contents onto the pellet, then shake well and leave to stand for 10-15 minutes. The mixture can be used and loaded into feeder.

- TM245 Big carp
- TM247 Squid
- TM248 Halibut
- TM249 Mango
- TM250 Garlic- Butyric Acid

Carp Line pellets

High quality feed pellets at an affordable price. This is what best characterizes the TOP MIX Carp Line feeding pellet range. One of the most popular baits today is pellets. It does not require special preparation, it does not need to be mixed in, at most it is soaked. It can be used immediately, without long-lasting quality damage. It can be used as a hookbait or even mix to groundbait. Carp Line pellets are made in 6 mm size and contain all ingredients needed for proper nutrition of the fishes. In addition to traditional strawberry, honey and fish flavors, sweet biscuits and tutti-frutti are two specialties.

 TM019 Fluo Carp Line Green Alfalfa
 TM028 Fluo Carp Line feeding Chocolate Biscuit

Feeding Pellets

These high-quality pellets should not be missing from the basic setting of carp anglers. With their fairly rapid dissolution, they attract the attention of fish in the vicinity of the feeding in a matter of seconds. During dissolution, a seductive cloud of taste and smell is created for a long time, around the spot, close to the bottom. They are available in 6 mm sizes and 3 kg packages. They can be used directly for feeding, boilie pre-feeding, or even for direct boilies when placed in a PVA net. Total dissolution time is 30-60 minutes.

MEGA Method hook pellets

Floating pellets developed primarily for method feeder fishing. The pellet is a larger, more selective version of the smaller Method Pellet. The pellet's effectiveness is enhanced by its colour, flavour and the tiny particles that dissolve very slowly. Pellets contain high nutritional value ingredients such as LT fishmeal, and their smell and taste enhance their attractiveness. In a good case, you can catch several fish with one pellet. The recommended method of presentation is either on a lure spike attached to a hairline leader or wrapped in a silicone ring attached to a hairline leader.

- TM150 Strawberry-Raspberry
- TM151 Pineapple
- TM152 Sweetcorn
- TM153 Garlic
- TM154 Chocolate Orange
- TM155 Mussel
- TM156 Liver

Bottled corn

Same grain size, hand crumbled corn in juice. With a label of a different color and taste to suit the taste, with a circular label at the top.

- TM501 Vanilla
- TM502 Honey
- TM503 Strawberry
- TM504 Garlic-Almond
- TM506 Prunes
- TM509 Blue Shell
- TM510 Amur / alfalfa
- TM511 Scopex
- TM513 Palinka
- TM514 Amur special (weed sedge)

Pickled glass corn

Made with a special pickling process, same grain size, hand-crumbled, juice-free corn, with strawberry (red), honey (yellow) and vanilla (natural) and weed-sedge (green) flavor.

- TM520 Honey
- TM521 Strawberry
- TM522 Vanilla
- TM523 Weed - Sedge
- TM524 Bloodworm
- TM525 Pineapple
- TM526 Garlic-Almond

- TM314 MagicCorn Strawberry 3x25pcs
- TM315 MagicCorn Honey 3x25pcs
- TM316 MagicCorn Chocolate-Orange 3x25pcs
- TM317 MagicCorn Pineapple 3x25pcs
- TM318 MagicCorn Garlic 3x25pcs
- TM319 MagicCorn Sweetcorn 3x25pcs

MagicCorn

TOP MIX MagicCorn is a corn imitation (rubber corn) with properties that make it irresistible to fish when offered with good bait presentation. Deceptive resemblance to real canned corn, excellent floatability and intense flavour. The taste and aroma are unique, and it comes in a handy jar from which it can be removed with a small spoon. The jar contains 3x25pcs of corn of different sizes, the medium size („M”) is typically the size of a box of corn, the larger size („L”) is for sorting smaller fish and the small size („S”) is a real competition size, used when you want to catch fish, regardless of size. If you need a bigger bait, you can attach two pieces to the right size bait spike.

AQUA VITAL SWIM

Extruded floating pellets made from premium quality fishmeal.

For surface carp fishing. Available in 6mm sizes, 800g and 25kg packages.

Aqua-Garant pellets are produced by the Austrian factory Garant Tiernahrung for the Central and Eastern European markets. With State-of-the-art technology, and the use of the highest quality raw material, an in-house laboratory and ISO and HACCP certifications guarantee GMO-free, high-quality fish food for a wide range of fish species.

AQUA MIX2 CU

A mixture of Aqua Classic, Aqua Uni and Aqua Dynamic 2mm pellets in the right proportions for carp fishing. It can be used directly for feeding, in ground form for method fishing, for paste making, or soaked in a method feeder.

AQUA MIX4 CU

A mixture of Aqua Classic and Aqua Uni 4mm pellets in the right proportions for carp fishing. It can be used directly for feeding, in ground form for method fishing, for paste making, or soaked in a method feeder.

AQUA MIX2 CUD

A mixture of Aqua Classic, Aqua Uni and Aqua Dynamic 2mm pellets in the right proportions for carp fishing. It can be used directly for feeding, in ground form for method fishing, for paste making, or soaked in a method feeder.

AQUA MIX4 CUD

A mixture of Aqua Classic, Aqua Uni and Aqua Dynamic 4mm pellets in the right proportions for carp fishing. It can be used directly for feeding, in ground form for method fishing, for paste making, or soaked in a method feeder.

AQUA UNI Trout pellets

The most successful Aqua Garant pellet for anglers and match anglers. This pellet is characterized by a strongly fishy aroma, high intrinsic value and excellent solubility. Can be use directly in the method feeder in soaked condition.

Available in: 2 - 4 - 6mm sizes and in 800g and 25kg packaging.

AQUA START

The AQUA START 1.5mm pellet is the highest quality pellet from AQUA GARANT, as it was originally made for fish farms where juvenile fish require the best quality food. In fishing, on the other hand, it shows its effectiveness specifically in a competitive circumstance. It has extremely high content values, spiced with some attractors, which causes the fish to start eating even more intensely.

AQUA CLASSIC Carp pellet

The most well-known among anglers is Aqua Garant pellets. The composition of pellets is already very attractive to fish, but it is also excellent to can be flavored. Available in 2 - 4 - 6 - 8 mm sizes and in 800g and 25kg packages.

AQUA Catch drilled pellets

Great for baiting, but for feeding as well. It has a strong fishy smell, an oily texture and can be successful for both carp and catfish.

Available in 20mm drilled size, Available in 800g and 25kg.

AQUA DYNAMIC Trout pellets

Highly fishy, oily professional competition pellets from Aqua Garant. In method feeder, and in PVA mesh is also excellent. Available in sizes 2 - 4 - 6 mm. Available in 800g and 25kg packages.

AQUA Betaine Complex

A special additive blend of Aqua pellets, popular among the anglers, which contains betaine and colouring in addition to the high protein content of the pellets. Betaine is a naturally appetite stimulant. It is a widely used additive to increase the attractiveness of the bait. Fish rely mainly on their sense of smell to recognise food, which is stimulated by certain amino acids dissolved in water, as well as by betaine. Betaine triggers a feeding stimulus, which is why it is used to feed intensively farmed fish. Once in the water, it forms a spectacular mist that attracts the attention of the fish as they sink. Aqua Betaine Complex is available in five colours to suit to blend in with the bottom. In competition conditions, when the intensity of the bites is diminishing, a new shade of colour can boost the fish's declining appetite. The Aqua Betain Complex range is designed for such situations.

- TM554 AQUA Betain Complex Orange
- TM560 AQUA Betain Complex White
- TM561 AQUA Betaine Complex Yellow
- TM562 AQUA Betaine Complex Red
- TM563 AQUA Betaine Complex Green

Aqua Wafers

AQUA pellets and grinds are the most popular groundbaits for method feeder anglers. To match, we have created these unique wafers designed for feeder anglers who like attractive dissolving baits. They're balanced pellets, but just enough to be used with #14 hooks alongside fine barbs in the smallest 8mm sizes. They are based on a blend of Aqua Classic and Classic-Uni pellets, so they have a high protein content of 37-45%. Both versions are available in sizes 8 - 10 and 12 mm. The dissolving capacity is intense, „open bait”, so the content value also attracts fish around the feeder.

- TM564 Aqua Wafers Classic 8mm
- TM565 Aqua Wafers Classic 10mm
- TM566 Aqua Wafers Classic 12mm
- TM576 Aqua Wafers Classic-Uni 8mm
- TM577 Aqua Wafers Classic-Uni 10mm
- TM578 Aqua Wafers Classic-Uni 12mm

Aqua Boilie

High-quality boilie made from AQUA GARANT pellets ground by a special process. An open, soluble boilie with an outstanding protein content of 37%, combined with a balanced protein to carbohydrate ratio. A special carp delicacy, designed with digestibility and fish protection as the main criteria (in addition to attractiveness), so we have eliminated all artificial flavours, preservatives and additives. The dissolving time is 4-6 hours, but after only one minute the particles are spectacularly detached, and the ingredients that are released quickly exert their luring effect.

- TM527 Aqua Boilie 20mm
- TM528 Aqua Boilie 24mm

ALLSORTS TOURNAMENT WAFTERS

Allsorts TOURNAMENT Wafers

Top Mix Allsorts Tournament Wafers are soluble pellets based on many years of tournament experience, and come in a jar of the most popular colours used in angling. It contains a mix of white, yellow, orange and pink wafers. All of them are dumbell shaped and come in 8, 10 and 12 mm sizes. The sweet flavoured wafers have been given a white chocolate flavour and have proven to be catchy in all seasons. Their buoyancy is very low, so that they can be used with light and small hooks and fine baits. Designed specifically for competition anglers, but also for hobby anglers due to its space saving and catching qualities!

- TM328 Allsorts Tournament Wafers 8 mm
- TM329 Allsorts Tournament Wafers 10 mm
- TM330 Allsorts Tournament Wafers 12 mm

AQUA Nitro Boost Gel

A flavour gel specifically developed for method feeder fishing, including Aqua Garant pellets, but also effective for fine line or ribbed feeder methods. Its range of applications is limited only by the imagination, equally suitable for flavouring and colouring sweetcorn, flavouring maggots or even boosting PVA bags. The thick flavour gel spreads horizontally across the bottom, exerting its strong smoky effect, so that the flowing water does not carry it far with the fish. Its intense aromas attract fish to your feeder, so you can lure them to the water faster. PVA friendly product!
Available in seven flavours.

- TM108 AQUA Nitro Boost Gel Headshot
- TM109 AQUA Nitro Boost Gel Pineapple
- TM110 AQUA Nitro Boost Gel Garlic-Fried Liver
- TM111 AQUA Nitro Boost Gel Krill-Shellfish
- TM112 AQUA Nitro Boost Gel Strawberry Cream
- TM113 AQUA Nitro Boost Gel GLM
- TM109 AQUA Nitro Boost Gel Lake Balaton

AQUA Method Sray

AQUA Method Spray is a concentrated flavor for fast, external aromatization and coloring of hookbaits, pellets in the feeder and groundbaits.

The effect can be explosive! The spray was developed primarily for AQUA, but this does not excluded effectively use for other feeders and pellets.

- TM435 Strawberry cream
- TM436 Mango- Plum
- TM437 Krill Mussel
- TM438 Panettone
- TM439 Garlic Liver
- TM471 Banana-Pear
- TM472 Pineapple-N-butyric

Aqua Pellet Breadcrumbs

In Method fishing, it is often necessary to change the pellet mix used in order to get a bite or even more bites. This is when we usually „powdering” with Method groundbaits. This changes the taste, colour and even forms a little cloud. Pellet powdering offers a better, more effective solution than this.

- because it sticks more easily to wet pellets
- because it forms a more effective, larger cloud
- because it colours the pellets well
- because it gives your pellets an intense flavor

- TM120 Pellet Breadcrumbs Strawberry Cream
- TM121 Pellet Breadcrumbs Green Betaine
- TM122 Pellet Breadcrumbs Sweet Fruit Caramel
- TM123 Pellet Pineapple-Scopex
- TM124 Pellet Breadcrumbs Garlic-Fried Liver

AQUARoma Booster for Aqua pellets

Special flavor mixture primarily for AQUA pellets. According to the test results, the contents of the bottle sufficient to 400g of pellets or pellet mixture aromatization. It is easy to use, you need to add it to the pellets and then wait 15-20 minutes to fill the feeder. It is recommended, however, to mix the contents of the vial in two portions with the pellet for better disintegration.

- TM435 Strawberry cream
- TM436 Mango
- TM437 Chocolate-orange
- TM438 Pineapple
- TM439 Garlic- Liver
- TM456 Sweetcorn

Pump-IT

Pump-IT is a dense, concentrated flavor range what raising attention of the fishes with their irresistible taste. Thanks to the practical pump packaging, it can also be used locally. This is especially important in method basket fishing, when we need to raising attention of the fishes if we taken on the middle of the feeder, where is our hookbait. Important to mention that this is a PVA friendly product, so it is perfectly suitable for concentrated flavoring of PVA sticks and stick mixes

- TM480 Pump-IT Boodworm
- TM481 Pump-IT Blue Cheese
- TM484 Pump-IT Butyric Acid
- TM478 Pump-IT Liver
- TM479 Pump-IT Krill
- TM485 Pump-IT Strawberry
- TM486 Pump-IT Garlic
- TM487 Pump-IT Pineapple
- TM488 Pump-IT Lake Balaton

Top Mix Pre digested seeds are produced by a pre-digestion process, which is not a recent development in animal nutrition and this also applies to fish feed. One of these processes is the post-cooking treatment with digestive enzymes, which is technically relatively easy to perform, but requires a great deal of experience and expertise.

However, its baiting effect is unquestionable. Even without preservatives, the prepared seeds, which are then packed in food-safe packaging, retain their freshness and thus their attractiveness for a very long time. The pre-digested seeds do not saturate the fish and provide them with a fast metabolism, so they keep returning to the feed.

Tiger nuts, maize, wheat and special mixtures of these with additional seeds for carp and grasscarp are also available.

TM584 Pre Digested Maize
 TM585 Pre Digested Wheat
 TM586 Pre Digested Carp Mix
 TM587 Pre Digested Grasscarp Mix
 TM588 Pre Digested Tigernut

TM499 Feeder MAG-MIX

Originally this type of products is made for feeder fishing. However, it can also be used for other ways of fishing. The Feeder seed mix is a moist mixture of cut seeds. After opening, it must be crumbled before use, so that it falls apart. Then you can already push it directly into the Feeder basket. Its catchability can be enhanced by using 2-4mm pellets. If you need to get a lot of seeds in with a feeding basket, this is the best choice. It can be used when mixed with a feeding material or only on its own.

Corn SMOOTHIE

(80%) Crushed maize, (10%) wheat and (10%) flavoured, coloured, pureed form of canola. In carp fishing, we often use pureed versions of seeds, especially maize, which is quite difficult to prepare. By using of this product, we no longer have to waste time, we can do the whole preparation process of the grain feed additives by ourselves and now we can find it all in a single product. The result is a perfect mixture if we mix the smoothie with these dry ingredients.

TM490 Corn SMOOTHIE Natur
 TM491 Corn SMOOTHIE Honey
 TM492 Corn SMOOTHIE Strawberry
 TM493 Corn SMOOTHIE Big Carp
 TM494 Corn SMOOTHIE Butyric Acid

PRESTON INNOVATIONS

OWNER
PERFECTION IN HOOKS

Sweetener

Sweetening groundbait is a common thing. The sweetener does not add any extra scent or taste to our groundbait, but it does give it a sweet taste that no other additive can! Dosage is a matter of taste, but it is really effective especially in warming and cooling waters. The contents of the jar are enough to sweeten 100 kg of groundbait.

Groundbait dye

Used for colouring groundbaits. It has a very strong dyeing action, so typically only a small amount is needed. It is important to mix it with the dry material. By dosing it, you can colour your bait through shades of grey to full black. The contents of the jar are sufficient to dye black 60kg of groundbait.

Pastoncino

TOP MIX Pastoncino is a special additive. Which is a mixture of oily, sinking, lemon aroma-treated sweet, medium-grain „heavy crumbs” and “negro seeds”. The emphasis is on the extremely intense lemony aroma, which is especially effective in warm waters in summer. Small particles (red or yellow) that appear in the feeding material that are ate by the fish. Tasty snacks keep them at the fishing spot for a long time. In its native Italy, carp mixtures are an indispensable ingredient. In Hungary, you can't miss it from good blends. The yellow colour should be used in the waving waters and the red one in the clear waters.

- TM222 Pastoncino red
- TM223 Pastoncino yellow

Breadcrumbs

High-quality sinking crumbs of red and yellow originating from Italy. All types of fish like and prefer selecting these particles of the feeding material. Therefore, it is advisable to mix 2-10% for each feeder.

- TM201 Breadcrumbs red
- TM202 Breadcrumbs yellow
- TM205 Breadcrumbs crumb red-yellow

TM208 Tourteau de maiz, ground

It has the advantage of being much quicker to ferment, so it can be used sooner than the lump version.

TM210 Tourteau de mais Extra TM209 Tourteau de Mais, örölt, fekete

Corn scones of extra quality, large pieces, with higher oil content, manufactured in Italy and added to the feeding material by soaking them or mixing them with an aroma. Use: soaked at least half an hour before fishing, it is advisable to add 2 litres of water, possibly an aroma, and then mix continuously with 4-5 kg of dry feeding material. Recommended for all species of fish, but especially fond for brethren carp and caras

FLUO crumbs

Special and outstanding additives are these “flou-colored” crumbs. Thanks to their very bright colour and very delicate sweet taste, they are effective baiters. Even in murky waters, the particles can be seen, enhancing the taste effect with the visibility. According to the tests, it is clear that despite their striking colour, fishes do not see it alarming but it increases the catchiness of the feeding material. They are also useful for river fishing. We also use these “flou” crumbs in our new Big Carp XT feeders. TM224 Fluo crumbs yellow

FLUO

crumbs

- TM225 Fluo crumbs orange
- TM226 Fluo crumbs red
- TM227 Fluo crumbs green
- TM228 Fluo crumbs mixed

TM230 Cheese based flour
Grated 100 % dried Parmesan cheese. An additive for Mullet feeding agents. Mixed with soaked bread, you get a ready-made cheese delicacy for mullets. Boily using anglers also use cheese during the warm summer season, so it's worth making carp feeders special with a little cheese. Recommended use rate: 5-30%.

TM235 Terre de somme
TM233 Terre de somme - Black
Light brown clay with loess, which dissolves rapidly in water and therefore it is suitable for "cloudy" feeding. Use mixed with feeding material in 5-50% to release mosquito larvae into water.

TM234 Terre de riviere - Black
TM236 Terre de riviere
Dark brown, oily, slow-dissolving, heavy clay suitable for fishing on the bottom of lakes and in rivers. Use 5-50% in the feeding material to deliver mosquito larvae into the water. From a mixture of the two clays, any consistency can be mixed.

TM238 Washed Gravel , 1,6 - 3 mm
Even grained washed gravel. Use this product to control the weight of the feeding material.

TM280 TOP GUM Maggot Glue, 200g
100% gum arabic from Saudi Arabia. The finest feeding glue. Because of the efficiency of the product, you only need a little of it. Dissolves quickly in water. Both Alan Scotthorn and the England team used it at the European Championship in 2005.

TM212 PV 1 Collant
High nutritional adhesive imported from Belgium. Recommended use rate: 5 - 20%. The higher value shall be used for river angling. Fish species: carp, brethren, paduc, barbel.

TM237 Bloodworm separating powder
Dark brown loess is a dry version of a very finely ground powder. Perfect for separating mosquito larvae. Spread a small amount on the mosquito larvae, and mix it gently. If the larva is fresh enough, it breaks it into pieces and keeps it alive for a long time, since it is a completely natural substance. It is also suitable for drying over-moistened loess. 250 g

TM 215 Fish meal
High quality fish meal made from North Sea fishes. Due to its high nutritional value, it can be mixed with almost any carp feeding material, especially in warm waters

Groundbait and partickle glue
Maize-based adhesive for feeding material which is available in a variety of flavourings. You are able to use this product with almost everything. For instance you can glue the maggots together with corn and gravel. It is advisable to mix it with fry feeding material.

TM270 Natural
TM272 Vanilla
TM273 Honey
TM274 Strawberry

STRADIVARI

Reel METHOD FEEDER

Stradivari Method Feeder

The rods are made of high quality 30T carbon. The excellent properties of the material used make the rods light, firm and very easy to handle. The rods have been designed to be a pleasure to fish with and to minimise the possibility of losing fish. The rods also have a „front” for fatigue and a sufficiently strong backbone in shorter sizes. It’s this backbone that allows for accurate, long distance casts on the longer versions, retaining the fun of the ploughing experience.

They are among the lightest in their class, making fishing comfortable. The finest 3.30 and 3.60 rods are single-foot raised, while the more powerful 3.90 and 4.20 two-footers are fitted with high-quality SeaGuide to meet today’s standards. The surface of the rods is „raw carbon”, while the inscriptions underneath have a glossy lacquer finish. The length of the handle ensures comfortable handling, while the material - a combination of EVA and cork - provides a pleasant grip. The end of the handle is finished with a hard cork and the rods also feature a hook ring. The rod tips have triple-backed spike guides, so they do not bend and there is less chance of them unwinding when casting, and therefore less chance of breaking.

Code	Lenght	Section.	Lenght
TM610	3.30M	3+3	45g
TM612	3.60M	3+3	60 g
TM615	3.90H	3+3	120g
TM616	4.20H	3+3	160 g

Code	Weight	Trans.	Lenght
TM610	157g	1-1,5-2 oz	115cm
TM612	182 g	1-1,5-2 oz	125 cm
TM615	232g	2-3-4 oz	135cm
TM616	312g	2-3-4 oz	145 cm

DISTANCE FEEDER

390 / 420

HIGH-PERFORMANCE CARBON FIBER

TORAYCA

NEW!

DISTANCE Feeder rods

Feeder rod specially designed for long distance fishing in lengths 390 and 420. The TORAY carbon blank made with high quality materials, the matching SEAGUIDE guide line and the optimized handle length for distance casting guarantee that with this feeder rod there is no distance out of reach. Under open hands, 150-170m can be achieved with the 420 version, while the 390 long version can cast 120-140m. If you're also looking at the long distance casting National Championship, you should definitely consider this 4.20m feeder rod, as 207m was cast with this rod at the 2022 distance casting National Championship! We also recommend it for those who like to fish long distances, over 100m, in hobby or tournament conditions. A long test period preceded the release, as test specimens of these rods were used at the 2021 Method Club Team Championships at Maconka Reservoir, where the Top Mix team won the championship. They also reached their final form at the same tournament and venue in 2022, where team members again took podium finishes. Distance feeder rods are firm and strong, yet slimmer than their counterparts.

ALL DISTANCE FEEDER ROD COMES WITH A CARBON ROD TIP HOLDER!

T-REX

METHOD FEEDER

Reels

T-Rex Method Feeder

The rods are made of high quality 24T carbon. Thanks to the excellent properties of the material, the rods are light, firm, well loadable and very handy. The rods have been designed with great care to make fishing a pleasure and to minimise the possibility of losing fish. As a result of the perfectly tuned characteristics, you can fish the desired distance with ease and precision and there is no fear of losing fish even when fishing with small hooks and thin hooklinks. They are among the lightest in their category, making fishing comfortable. The rods are fitted with double-ended SeaGuide rings of the highest quality, which is today's standard. The surface of the rods is lacquered matt black. The length of the handle is optimum for casting, while the material - a combination of EVA and cork - provides a pleasant grip. A hook ring is also fitted above the handle on the blank. The quivertips are fitted with triple-supported tip rings, so they do not bend and there is less chance of them tangle when casting, and therefore less chance of breaking. The T-Rex Method Feeder rod range is available in 3.60 and 3.90 meter lengths and two strengths per length, offering the perfect solution for most situations.

Code	Length	Sections	Casting Weight	Weight	QuiverTips	Tansport Length
TM602	3.60M	3+3	80 g	235 g	1,5-2-3 oz	125 cm

T-REX RIVER FEEDER

Reel

T-Rex River Feeder

The T-Rex River Feeder range of rods is made using 24T Carbon material. Thanks to the high quality of the material, the rods are extra strong, light, flexible and easy to load. It is safe to say that these rods are unbreakable in normal use! As a result of the perfectly tuned characteristics, you can fish the desired distance with ease and precision and there is no fear of losing fish even when fishing with small hooks and thin hooklinks. The rods have a sophisticated design with a high quality cork and EVA combination of sufficient length, a very comfortable grip handle and a strong reel seat to hold the reel properly. The rods are equipped with high quality SeaGuide rings with two-way fittings to meet today's standards. A hook ring has also been fitted above the handle on the rod body. Although the rods are not specifically designed for distance casting, the 4.20 rod was officially measured at 165 metres in the distance casting National Competition. The rods are supplied with three different quivertips of 2-3 and 4 oz. The T-Rex River Feeder rods come in lengths of 3.90 and 4.20 metres, offering the perfect solution for shore anglers on the river.

Code	Length	Sections	Casting Weight	Weight	QuiverTips	Transport Length
TM608	3.90HH	3+3	300 g	335 g	2-3-4 oz	135 cm
TM609	4.20HH	3+3	300 g	370 g	2-3-4 oz	146 cm

ARROW PRO Method Feeder basket

The longitudinal ribs on the ARROW PRO method feeder provide excellent retention of the bait, provide a good place for the hookbait and reduce the possibility of tangle. The advanced centre of gravity, weight design and shape are the most streamlined design of any feeder to date. The longer shank and guide wing on the stem give the method feeder excellent flight, distance and accuracy on casts. The design also reduces the sound of the splash when the feeder hits the water. And the gripping lugs on the bottom ensure the feeder is slip-resistant.

To meet the needs of anglers, the method feeder can be removed from the mainline and replaced in a snap without having to dismantle the rig. Providing great freedom for transport or for varying the weight of the method feeders. For the upper part of the feeder, we used 50% recycled fluoroclear material.

TM764 ARROW PRO Method feeder 30g

TM765 ARROW PRO Method feeder 40g

TM766 ARROW PRO Method feeder 50g

TM767 ARROW PRO Method feeder 70g

TM763 ARROW PRO mould

This year's new feature of the TOP MIX Method Feeder program is a folding basket filling tool, which makes it extremely quick and easy to fill and empty method Feeding baskets. Opening it on the longitudinal axis prevents the feeding material from sticking to the filler. Unlike conventional chargers, you don't have to press, just open it and the feeding material falls off the basket, which never sticks! Thanks to its universal design, it can also be used for other feeding baskets as well.

NEW!

TM659 ARROW PRO Silicone mould

The ARROW PRO silicone mould is a proprietary development designed for our ARROW PRO method feeders. The flexible silicone moulds fits perfectly on the ARROW PRO Method feeders. Due to its design, material and feeder removal mechanism, there is no stuck loading. It has no moving parts, so it will not fail. Its use allows fast, efficient and easy loading. Can be used with other method feeder of similar size and shape.

ARROW Flat EVO Method Feeder

An improved version of the Arrow Flat Method feeder, which differs in that it is designed to be detachable from the shank and the line without disassembling the rig. Its clear material does not arouse suspicion in fish feeding around the feeder. Its handle and wing allow it to be cast stable over long distances, it doesn't float in the air and it doesn't lose its accuracy in wind. Its tiny „claws” grip the substrate, so it's not easily dislodged from its feeding by a tight line. The central ribs are angled to allow it to be used with larger baits. These feeder are also available in L and XL sizes.

- TM662 ARROW Flat EVO Method feeder L 30g
- TM663 ARROW Flat EVO Method feeder L 45g
- TM664 ARROW Flat EVO Method feeder L 60g
- TM665 ARROW Flat EVO Method feeder L 80g
- TM666 ARROW Flat EVO Method feeder XL 30g
- TM667 ARROW Flat EVO Method feeder XL 45g
- TM668 ARROW Flat EVO Method feeder XL 60g

ARROW Flat Method Feeder

Based on customer reviews, our two most popular method feeder are the Arrow Pro and the Improved. The Arrow Flat Method is a cross between these two feeder, incorporating the best features of both. Its clear material will not arouse suspicion in fish feeding around the feeder. Its handle and wing allow it to be cast stable over long distances, it doesn't float in the air and it doesn't lose its accuracy in windy conditions. The tiny „claws” grip the substrate, so it's not easily dislodged from the feeding by a taut line. The central ribs are angled to allow it to be used with larger hookbait. Its universal shape fits most manufacturers' mould. Also available in L and XL sizes

- TM620 ARROW Flat Method feeder L 30g
- TM621 ARROW Flat Method feeder L 45g
- TM622 ARROW Flat Method feeder L 60g
- TM623 ARROW Flat Method feeder L 80g
- TM617 ARROW Flat Method feeder XL 30g
- TM618 ARROW Flat Method feeder XL 45g
- TM619 ARROW Flat Method feeder XL 60g

ARROW Flat silicone mould

The ARROW EVO/Flat silicone mould is a proprietary development designed for our ARROW Flat and ARROW Flat EVO method feeders. The flexible silicone mould fits perfectly on both types of feeder. Due to design, material and feeder extraction mechanism, there is no stuck loading. It has no moving parts, so it will not fail. Its use makes loading quick, efficient and easy. Made in two sizes, „L” and „XL”, to fit the feeders. It can also be used with other method feeders of similar size and shape.

TM811 General purpose folding method mould
Special folding mould for TOP MIX and other manufacturers' feeder. The feeder, after loading, can be removed by opening the mould, avoiding the possibility of adhesion.

- TM660 ARROW Flat Silicone mould „L”
- TM661 ARROW Flat silicone mould „XL”

ARROW 3 and 4 ribed pellet feeder

3 and 4 ribbed Method feeder baskets. When designing the baskets, we focused on making the lower bob heavier, placing the center of gravity of the basket forward, thereby increasing the throwing distance and accuracy. The special feature of the baskets is the unique darts wing, which further increases the throwable distance and ensures increased accuracy.

- TM638 3 ribed ARROW pellet feeder 25g
- TM639 3 ribed ARROW pellet feeder 35g
- TM640 3 ribed ARROW pellet feeder 45g
- TM630 3 ribed ARROW pellet feeder 55g
- TM631 3 ribed ARROW pellet feeder 65g
- TM641 4 ribed ARROW pellet feeder 25g
- TM642 4 ribed ARROW pellet feeder 35g
- TM643 4 ribed ARROW pellet feeder 45g
- TM632 4 ribed ARROW pellet feeder 55g
- TM633 4 ribed ARROW pellet feeder 65g

TOP VARIO Feeders

Two-in-one, that's how you could describe these feeders for both long hoklink and method feeder. Its made with clear plastic mesh, aesthetically pleasing, with a weight built into the plane of the feeder and a replaceable stem. The stems can be interchanged to suit different methods. While for the method feeder an internally guided stem is used, for the long stem a built-in swivel stem is used. When casting, the longer shafts guide the feeder well, so that accuracy is ensured in addition to distance. When using the method feeder, no filling tool is needed and the hookbait is either put in the end of the feeder or simply left free. For the long hooklink solution, use the rotating shank. The mesh size of the feeder ensures proper release. Both stems are included.

- TM725 TOP VARIO Feeder „S” (25g, 28x21mm)
- TM726 TOP VARIO Feeder „M” (25g, 28x28mm)
- TM727 TOP VARIO Feeder „L” (28g, 32x32mm)

TM780 Method Feeder guide-wing

Regular guide-wing for TOP MIX Method feeder, but it can also be used with other feeder as well, like Preston. It is very easy to use, you have to pin it to the front part of the tap.

TOP DISTANCE Feeders

TOP DISTANCE feeders are specifically designed for long distance, accurate fishing. As the lead is not on the side of the feeder but on the end, it flies like an arrow when cast. With the large versions, a medium heavy feeder rod can be cast accurately 60-70 metres away, even in a rising wind. Smaller sizes can be accurately cast 20-40 metres with a light feeder rod in all weather conditions. As the lead is located at the bottom, the loosely filled feeder can empty its contents even at the midwater, which is particularly useful on muddybottom or for fish feeding at the midwater.

CRAB river feeder

Special feeder made for river angling. The spike is to be bended in 45°. The twist bends the fishing line and it's legs drill into the bed and secure the basket extremely well. Because of it's shape the twisting also pushes the basket towards the bed helping it's bottom to indent. Even though the small size of the basket we can use enough feeding material. It is a great advantage that it is enough to use 125g of feeding material in comparison with other baskets which we have to use 200g with them. It is much easier to handle, it spares the fishing rod, we can use tighter fishing line and we will also have less loss when using fish fatigue technique.

- TM728 TOP DISTANCE Feeder „L” 30g
- TM729 TOP DISTANCE Feeder „L” 40g
- TM730 TOP DISTANCE Feeder „S” 30g
- TM731 TOP DISTANCE Feeder „S” 40g
- TM732 TOP DISTANCE Feeder „XL” 60g

- TM706 CRAB river feeder 100g
- TM707 CRAB river feeder 125g
- TM708 CRAB river feeder 150g

Method Feeder Circle Hook

Made in Japan, the almost circular hook is a popular hook type among method feeder anglers. Large bodied, barbed hook point, short shank, excellent edge holding, chemically sharpened micro bearded and beardless black nickel finish tipped ear hook. Primarily recommended for hair rig or tipped bait, be it pellets, wafers, boilie or even seeds.

- TM974 Method Feeder Circle Hook Barbed #6
- TM975 Method Feeder Circle Hook Barbed #8
- TM976 Method Feeder Circle Hook Barbed #10
- TM977 Method Feeder Circle Hook Barbed #12
- TM828 Method Feeder Circle Horog Barbless #6
- TM829 Method Feeder Circle Horog Barbless #8
- TM830 Method Feeder Circle Horog Barbless #10
- TM831 Method Feeder Circle Horog Barbless #12

METHOD FEEDER hooks

Hooks made in Japan, developed for method, especially for method feeder carp fishing. Large bodied, adequately strong shank, slightly flared, excellent edge-holding properties, chemically sharpened, Teflon coated micro bearded, tipped hook. Primarily recommended for bait spike or hair rig, be it pellets, wafers, boilie or even seeds. Currently available in three sizes.

- TM920 Top Method Hooks #6
- TM921 Top Method Hooks #8
- TM922 Top Method Hooks #10
- TM755 Top Method Hooks #6, green
- TM756 Top Method Hooks #8, green

- TM761 Top Method Hooks #8, red
- TM762 Top Method Hooks #10, red

TM770 Bait spike on silicone 7mm
 TM771 Bait spike on silicone 10mm
 TM772 Bait spike on silicone 15mm

Bait spike on silicone

This solution avoids the problem of tying up the bait spike, which is a hassle for many. The bait spike must be cut off from the tablecloth, together with the silicone leader. The bait spike is then inserted into the bait and hooked onto the hook using the hole at the other end of the bait spike.

Bait Spike Fine

Designed for those who like competitive method feeder fishing and more cautious fish. Even bloodworm can be offered as bait without any problems with this little „instrument“. The diameter is almost half the size of the Fine bait spike, which also halves the weight. A 0.06 - 0.10 mm hook bait is best suited for use.

TM878 Baiting spike Fine \varnothing 0,3 x 7 mm
 TM879 Bait spike Fine \varnothing 0,3 x 10 mm

Bait Spike

The bait spike is designed for use with soft baits with a hair rig. Simply stick it in the bait and you're ready to fish! The two barbs on the shank of the spike hold the bait firmly in place, so you can cast 100 metres without any problems with soft pellets. It won't crack the pellet! It comes in three sizes, 7 - 10 and 15 mm, so you can choose the length of the bait spike to suit the size of the bait.

TM877 Bait spike \varnothing 0,6 x 7 mm
 TM875 Bait spike \varnothing 0,6 x 10 mm
 TM876 Baiting spike \varnothing 0,6 x 15 mm

Method Feeder rig

Simply insert the bait spike into the bait to be offered and you're done baiting. This product also solves the problem of mounting the bait spike and making the bait, as you only have to hang it under the basket.

TM880 Method Feeder rig (#6 hook/7mm spike)
 TM804 Method Feeder rig (#6 hook/10mm spike)
 TM805 Method Feeder rig (#4 hook/10mm spike)
 TM806 Method Feeder rig (#8 hook/7mm spike)
 TM807 Method Feeder rig (#10 hook/7mm spike)

Baitspike Red

A red-coloured, thinner and lighter version of the traditional 0.45mm thick baitspike. It is designed for those who prefer a more delicate method of feeder fishing, as it can be used to hook smaller wafers without any problems

TM768 Red bait spike \varnothing 0,45x7mm
 TM769 Red bait stick \varnothing 0,45x10mm

Silicone pellet hoop

A special soft and flexible silicone ring, the bait is not hooked on the hook directly, but in the ring, and then can take on the hook in the small hole on the edge of the ring. This creates an invisible contact between the bait and the hook that even the most cautious fish won't notice.

- TM773 Silicone pellet hoop „S”
- TM774 Silicone pellet hoop „M”
- TM775 Silicone pellet hoop „L”

TM776 Silicone hair rig set

The silicone hair rig is designed for easy preparation and hooking of laced baits. A baiting needle is also required to string the bait. The package contains 3 lengths of hairpins and 4 to 4 of each size. For 1-2 grain corn or 1 grain pellets and boilie, use the short leader, while for larger baits use the longer.

FEEDER Quick change swivel

Quick change swivel for fine line feeder anglers, with rubber hook guard for quick change of rig. The rig is simply hooked into the hook of the quick release and the top rubber hook is pulled onto the hook. The ideal choice for the finest feeder and picker rigs. Available in two sizes „S” and „M”

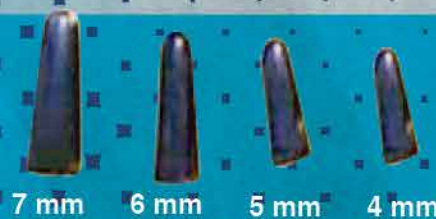

- TM635 Feeder quick change swivel „S”
- TM636 Feeder quick change swivel „M”

Rubber stopper

A strikingly tight, high quality rubber stopper with a barrel design for perfect floating, or feeder fishing tackle. Factory formed loops make them easy to attach to your monofilament or braided mainline.

FEEDER Stoppers

Special anti-tangle rubber hook and stopper for feeder fishing. It can be used to cover the connection between the main line and the anti-tangle stopper or between the main line and the power gum, thus preventing the rig from tangling. It will also act as a buffer for the feeder.

NEW!

- TM637 Feeder stopper „S”
- TM644 Feeder stopper „M”
- TM645 Feeder stopper „L”
- TM646 Feeder stopper „XL”

- TM647 Rubber stopper „S”
- TM648 Rubber stopper „M”
- TM649 Rubber stopper „L”

Method Feeder quick clamp

The quick change bumper is known to almost every method feeder angler. Based on our experience, we have also made our own Method feeder quick bumper in several versions. One of them is the traditional army green, which is a slightly stronger version of the ones we have known so far. It comes in size „S”. The other variation is made of fluorocarbon material, so it is much less visible in the water than lines made of similar material. Thinking also of long-distance method users, it is available in two sizes „S” and „L”. The smaller version is for fine fishing, the larger, stronger version is for long distance anglers with a large feeder.

- TM655 Method Feeder quick bumper „S”, army green
- TM656 Method Feeder quick bumper „SS”
- TM657 Method Feeder quick bumper „S”, fluoro clear
- TM658 Method Feeder quick bumper „L”, fluoro clear

TOP Feeder Gum

Feeder Gum is a flexible rubber that forms a harmonious transition between the mainline and the thinner hooklink. Its function is to distribute and compensate for the extra load generated by casting, and tiring thus preventing fish loss or, in the worst case, mainline or leader breakage.

Its relative stiffness also prevents the formation of tangles. Its elongation does not compromise the effectiveness of the notching, but prevents the breakage of the leader in the event of sudden force.

- TM785 TOP Feeder Gum 0,6mm
- TM786 TOP Feeder Gum 0,8mm
- TM787 TOP Feeder Gum 1,0mm

Fluoro clear rotating impact beads

A specially designed stopper for inline feeder, where the mainline is connected to a swivel with a fluoro carbon blanket.

The hooklink is connected to the other end of the swivel. It provides a fixed connection without slipping or twisting.

- TM777 Swivel stop bead fluoro clear „S”
- TM778 Swivel stop bead fluoro clear „L”

X8 MONSTER pre-starter

A high quality, 8 strand, perfectly round woven, top of the range braided hooking range. High performance, thanks to the 8 strands, the line is perfectly circular over its entire length.

Code	Diameter	Breaking strain	Packaging
TM740	0,08mm	5,5kg	10m
TM741	0,10mm	5,9kg	10m
TM742	0,12mm	8,2kg	10m
TM743	0,14mm	9,5kg	10m
TM744	0,16mm	10,5kg	10m
TM745	0,18mm	13,2kg	10m

X8 Power Sinking feeder zsinór

The X8 Power Sinking feeder line is made from 100% hi modulus PE fibres with a coating that allows it to sink quickly. Its sinking ability is similar to that of monofil sinking lines. Its surface is fully woven and its design and coating make it as quiet on the rings as monofilament. Compared to other sinking braided cords made from composite sinking fibres, Power Sinking's co-tolerance is at least 20% higher due to the 100% PE fibres. Its perfect smoothness, tangle-free and flexibility allow you to fish longer distances with less effort.

Code	Diamete	Tensile	Strength
TM735	0,08mm	4,8 kg	150m
TM736	0,10mm	6,0 kg	150m
TM737	0,12mm	7,0 kg	150m

NEW!

TM902 Groundbait bucket with bait tray, 18L
TM907 Groundbait bucket with bait tray 5L
TM904 Groundbait bucket with bait tray 10L

5 and 10 litre bucket with elegant black lid made of flexible material, with 2 and 3 litre white bowl (wall height 6,5 cm). In addition to the mixed bait stored in the bucket, the tray can also be used to store hookbait and protect it from drying out with a tightly closed lid.

TM917 Plastic tray

TM827 Plastic tray with sieve bottom

Large size bait tray for storing groundbait and livebait. The sieve bottom is useful for climbing bloodworms. Size: 20x30x10cm

TM885 Bloodworm limiter tub

Limiter Tub for bloodworms with measuring marks according to FIPS competition rules. The whole box is perforated, so the bloodworm can survive being placed in a container of water until limiting occurs.

Bait box with sieve bottom

High-quality, inner sides with volume scale, bait boxes with sieve on the bottom, for storing live bait with lid.

TM850 Bait box with lid, sieve bottom, 1/2 l

TM851 Bait box with lid, sieve bottom, 1 l

TM908 17 litre bucket

TM915 Roof for bucket

TM916 12 litre bucket

17 and 12 Litre, internationally approved, calibrated (inside litre division) groundbait mixing buckets.

TM848 Bait box, four compartments

TM852 Bait box with lid, 1/2 l

TM853 Bait box with lid, 1 l

Bait box

High-quality, inner sides with volume scale bait boxes, for storing groundbait, with lid.

TM862 Bait box

13 x 6 x 5 cm

Is a useful small bait box, especially when have to put a variety of baits next to us on the side tray short space.

TM863 Bait box set
(4x bait box 13x6x5cm
+ storage box)

4 small, 13 x 6 x 5 cm, bait box is in the stock.

Riddle for Bloodworm

The 16x16 cm riddle can be used for bait boxes. The larger size for a 20 x 30 x 10 cm container.

TM854 Riddle for bloodworm

TM855 Riddle for bloodworm flanged

Groundbait Riddle

Riddle for breaking through for soils and groundbaits. By using the feed, the soil will be more homogeneous, decomposing better, faster.

TM887 Feed sieve, 2 mm, for bucket

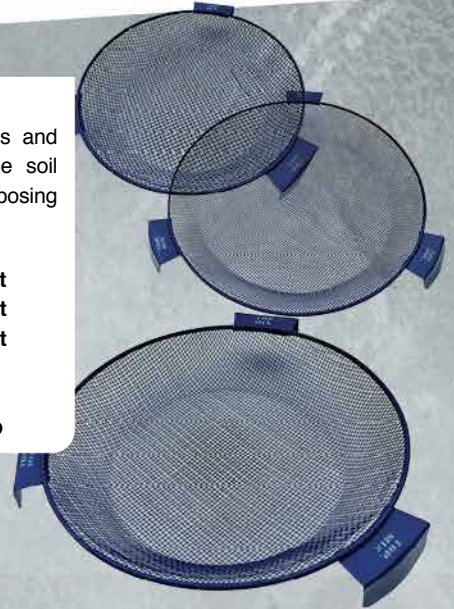

TM895 Feed sieve, 4 mm, for bucket

TM896 Feed sieve, 6 mm, for bucket

TM899 Feeding sieve, 2mm, for tub

TM897 Feed sieve, 4 mm, for tub

TM898 Feeding sieve, 6 mm, for tub

TM918 Riddle for bloodworm 20 x 30 cm

Bait limiter set

Using this set of boxes can be accurately measure the limited amounts of live bait in competitions. The set includes 5 stackable boxes, 1 l - 3/4 l - 1/2 l - 1/4 l, and a small 1/8 liter. We are added to the set two new containers, a 1.5 and one 2 liter.

TM784 Braided line cutting scissors with curved handle

These scissors, as it is in its name, can be used not only as a cutting tool, but also as pliers, lead take-offs and key ring openers. The curved grip is designed for easier access. Thanks to the micro-teething of the stainless steel scissors, you can cut any braided and monofilament line perfectly without hair. It is recommended for anglers who want to buy high-quality, multi-function scissors.

TM838 Limiter box accessory set
TM841 Bait limiter set

783 Ceramic braided line cutting scissors

Many and varied cutting tools have been offered to anglers to cut braided lines perfectly and without problems, but let's admit it, until now, no really good tool has been provided. TOP MIX, however, now offers a perfect tool for anglers, at least one that is more perfect than ever before: the ceramic material cutting scissors with cutting blades. With these scissors, there is no risk of the edge coming off (if it does not break) and cutting the braided line. No need to fret that your recently purchased scissors or pliers will just smear the thin braided line after the tenth cut. **WARNING!** Ceramic blades are brittle and can break easily, for example if you drop the scissors on a stone.

TM810 Method Feeder pre-tied rigs

Method feeder fishing typically uses short and braided line forks. Braided line cannot be knitted with two bibs, so storing the pre-tied rigs has been difficult. Therefore, anyone who wanted to store more than one/many pre-tied rigs always had to use unique solutions. However, this rig holder, developed by TOP MIX, eliminates the disadvantages of the previous one, a possibility to store many rigs.

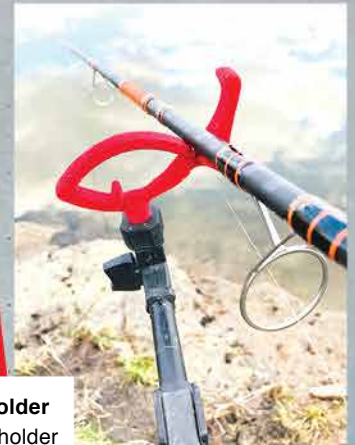

TM653 Távolesgmérő szett

It provides a complex solution for anglers who prioritise accurate fishing. The package includes two slightly curved aluminium bars with a flocked surface treatment, a threaded connector at the bottom and two aluminium holders, two holder disks with holes in the middle and a 3 m cord connected to each other. When assembling, screw the red-coated rods into the plastic disc and twist them into the end of a stop. The diameter of the rods is small enough to be put on a feeding basket and the surface is soft enough not to hurt the cord. The design and coating similar to velvet prevent the cord from sliding down.

TM654 TOP MIX Logo feeder rod holder

High-quality, elegant feeder rod holder made of aluminium with a well-designed surface..

TM881 Állítható neoprén botrögzítő pánt

A good, sensible and great product, this adjustable-length soft neoprene rod protector protects the bottom and top parts of our folded fishing rod at the same time. At the end of the fishing, we can pack our rods quickly, safely and easily with this practical adjustable rod cap. Due to its flexible length adjustment, all feeders, spinning rods can be used for boilie rods, protecting both ends of the rod members well.

Four-legged competition rod rest

Top quality four-legged rod holders for storing 12 and 2x12 rods or top sets. Common features include a very sturdy frame, stepless height adjustment up to 30-60 cm, push-button retractable legs, push-button removable legs, and an elegant carrying case. In the 2 x 12-legs version, one or two 12-legs storage can be attached to the frame in the desired position, either in the centre or offset to one side.

- TM987 Four-legged rod/ top set storage, 12 rods
- TM988 Four-legged rod/ top set storage, 2 x 12 rods

Rubber-coated landing net head with gear frame

Fine mesh based landing net head, with fish-friendly rubber-coated net. The frame is made of a lightweight but very robust aluminium profile. The floating sponge under the fabric does not sink, making it much easier and faster to handle in the water. A sturdy extra frame is attached above the „Y” stem, which you can grip with confidence, guaranteed to take the strain. The rubber coating prevents the net from absorbing water, so it dries quickly after fishing.

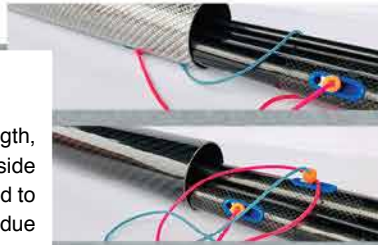

- TM882 Rubber landing net head with gripper frame, 40 x 50cm
- TM883 Rubber landing net head with gripper frame, 45 x 55cm
- TM931 Rubber landing net head with gripper frame, 50 x 60cm

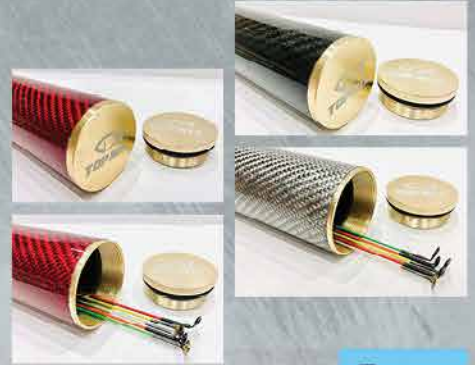

**TM821 Carbon topset holder,
Ø 45 x 1800mm**

Unique, sophisticated design with high-strength, multilayer carbon tube, with end caps on the same side for secure storage of pole top sets. There is no need to be afraid of dents or bend and damage the topset due heat of the sun.

TM820 Carbon feeder tip holder

Unique, sophisticated design tube made of high-strength, multilayer carbon material for safe storage of feeder rod tips with threaded end plugs on one end.

**TM822 Carbon stick holder,
Ø 60 x 1800mm**

Unique, sophisticated design with high-strength, multilayer carbon tube, with end caps on the same side for secure storage of pole rods. If you use this to store and transport your pole, don't have to worry about damaging your rod.

- TM859 Line marker white
- TM8592 Line marker red
- TM8593 Line marker yellow
- TM8594 Line marker fluo pink
- TM8595 Line marker fluo yellow
- TM8596 Line marker black

- TM845 Top set holder tube, diameter 40mm x 160 cm
- TM846 Top set holder tube, diameter 50mm x 180 cm
- TM847 Pole holder tube, diameter 60mm x 180 cm

It is used for safe storage and transport of poles and topsets. It's protect poles and topsets from scratches, contamination and external mechanical impacts.

Line marker

Used to mark the casting distance on a fishing line. By using it, we can always fish exactly on feeding spot. Available in White, Yellow, Red, or Fluo colors.

Fixed float stops

It is used for secure waggler floats without sliding on the mainline. A unique solution on the stopper is the notched part where can roll the line against sliding. There are 3 float stopper in one package

Silicon tube

Unpainted, thin-walled silicone tube for fixing floats. 50 cm/pack

- TM870 Silicone tube, 0.5 mm
- TM871 Silicone tube, 0.6 mm
- TM872 Silicone tube, 0.7 mm
- TM873 Silicone tube, 0.8 mm
- TM874 Silicone tube, 1.0 mm

- TM865 Fixed float stopper „S”
- TM866 Fixed float stopper „L”

864 Stainless Steel Whisk

When held in a drill, you can mix your feed in no time. It saves a lot of time, not to mention a much better quality, more homogeneous mixture. With the TOP MIX corrosion-resistant steel mixing shaft, it only takes a few minutes and the result is a perfect mix that doesn't even need sifting. Due to its design, the entire contents of the bucket can be quickly mixed.

**TM836 Method Waggler 20g
TM837 Method Waggler 25g**

Precision engineered feeder waggler float for midwater fishing. The feeder underneath the float is filled with the usual method groundbait or hook paste. The hookbait, mainly pellets, should be offered in the midwater. The fine-grained bait released from the basket will attract the fish under the float, and the constantly falling particles will cause them to come up to the water's edge and eagerly take the hookbait offered in the midwater.

Rig sticks (can be fixed on rod)

Practical rig stick for whisp or top set. Due to the design of the rig stick, not nesecary use fastener, it can be easily snapped onto the topset or on the appropriate thickness of the pole. Available in different sizes:

- TM960-27 for 10-13 mm diameter
- TM960-36 for 11-14 mm diameter
- TM960-45 for 12 -16 mm diameter
- TM960-54 for 15-20 mm diameter
- TM960-63 for 19-25 mm diameter

TopCam camou rod sleeves

The most demanding, beautifully crafted rod sleeves with an unadulterated waterfront vegetation effect, made with a combination of waterproof fabric and matching straps, two side pockets, strong zipper closure, colourful TOP MIX logo. Available in two lengths, two and three-flap versions.

Code Length Pocket

- TM941 140 cm 2
- TM942 140 cm 3
- TM944 160 cm 2
- TM945 160 cm 3

STRADIVARI 3 compartment rod sleeves

The most demanding, unadulterated autumnal waterfront vegetation effect, made with a combination of waterproof material and matching straps, these 3-compartment rod sleeves with a beautiful finish, strong zipper and colourful TOP MIX logo. Perfect protection for your made-up rods! Available in two lengths and in a three-compartment design.

- TM932 TopCam stiff rod sleeves 140cm
- TM933 TopCam stiff rod sleeves 160cm

TopCam Triple Ros Sleeve

The most sophisticated, unadulterated autumnal bank vegetation effect, made with a combination of waterproof material and matching straps, these 3-compartment stiff rod sleeve with a beautiful finish, strong zipper and colourful TOP MIX logo. Perfect protection for your redy-tired rods! They are made in two lengths and in a three-flap design.

- TM958 TopCam stiff rod sleeve 140cm
- TM959 TopCam stiff rod sleeve 160cm

TM924 TOP MIX WetNet Net Bag

Due to its size and undivided internal design, it can comfortably hold two competition keepnet side by side. Its EVA material prevents unpleasant odours and moisture from seeping into your car, even when the wet fish holder is stored inside. Size: 50*60*20 cm

TM926 TOP MIX WetNet Net Bag

Due to its size and undivided internal design, it can comfortably hold two competition keepnet side by side. Its EVA material prevents unpleasant odours and moisture from seeping into your car, even when the wet fish holder is stored inside. Size: 50*60*20 cm

TM906 Team Top Mix polar pullover polo sweatshirt red, embroidered inscription, with coat of arms

Team TOP MIX T-shirt

TM901 T-shirt, round neck, short sleeves, with TOP MIX logo
TM902 T-shirt, round neck, short sleeves, with TOP MIX logo

TM930 Hand Towel, with belt clip

28 x 36 cm hand towel with TOP MIX logo, microfibre and therefore excellent absorbency. The hand towel has a carabiner in one corner to attach the towel to yourself. Never has there been a softer and more absorbent hand towel on the market!

Thermacell mosquito repellent

The Thermacell No Mosquitos repellent provides a mosquito-free area of about 20 square metres for any outdoor activity, whether hunting, fishing or camping. The insect repellent is lightweight, power-free and portable. One bottle will repel mosquitoes and other blood-sucking arthropods for approximately 12 hours. One hour of mosquito-free garden parties or evening stalking costs just 185 HUF (when buying a 48-hour refill kit).

Other important features include: - 98% efficacy - Odourless - Unlike other sprays and creams, it does not come into direct contact with the skin and does not cause allergic reactions - Tested for the US Army and approved by the Environmental Protection Agency. The same refill kit can be used for all ThermoCell No Mosquitos repellents. One bottle of liquid gas can be used for 12 hours, and one alarm canister can be used for 4 hours. The refill pack can be stored for long periods of time and both the started gas cylinder and the alarm sticker can be safely left in the unit (stored in a cool, dry place).

Since it is an intermittent alarm, there is no need to use up a sheet immediately. For example, if there is only a one-hour mosquito invasion in the evening, the device can be switched off at any time, so one pad will last for four nights.

The synthetic active ingredient in the pad is called D-Allethrin, which corresponds to a natural insecticide, Pyrethrin (extracted from chrysanthemum!)
